

We welcome groups of all ages and interests to Eden and with so much to see and do, including a seasonal events programme, there's something for everyone.

### The Outdoor Biome

Covering 13 hectares, 10 years ago this was a barren landscape 15m below the water table with no level ground, no soil and no plants. Today you can discover crops that provide foods, fuels, medicines and materials in the Biome that has the sky for a roof.

### The Mediterranean Biome

Explore the sights, scents and stories of the Mediterranean, South Africa and California through plants such as citrus, olives, herbs and vines, South African proteas and aloes and Californian annuals, poppies and lupins.

### The Rainforest Biome

Experience the tallest rainforest in captivity as you stroll through the steamy jungle of Malaysia, West Africa and South America. Plants and crops in the Rainforest Biome include bananas, coffee, bromeliads (orchids), balsa and mahogany. Our new Rainforest Lookout aerial viewing platform is now open! A small additional charge applies.

### The Core

The ground floor exhibition explores environmental issues with quirky interactive exhibits such as the huge glass 'Plant Engine' and our mega nutcracker which looks at energy and processing issues around our food, fuels, medicines and materials.
