

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
1	Sharing sustainable knowledge	Reduce traffic on Great Ocean Rd. Anglesea cannot handle " thousands of visitors"	Environmental/sustainable construction and interpretation
2	revegetation	timeframes	bird monitoring
3	The whole lot. A fantastic project for the area.	Wheelchair access?	The whole lot
4	Education for young people; access to a beautiful part of the world for more than a chosen few	Nothing...it looks fantastic!	Opportunities for performing arts integration
5	Conservation	Structural aesthetic	What plants would be used
6	The use of the otherwise unused site	From what I have heard all elements so far seem to be perfect	Employment! I am a strong believer in what they have done in Cornwall, and am so pleased to have something similar coming to my local area
7	Rehabilitation of the mine site. An inspiring destination which will benefit the town's image and viability.	Commitment to using local skills, and resources where possible. Assume will be "environmentally friendly" during construction and when opened. Referrals to/from local businesses. No light pollution at night.	Which part of the Alcoa site would it occupy? How would it (positively or negatively) affect other proposed uses for the area?
8	using the site and beautifying the area	Not sure it fits with the small village of the town	n/a
9	Opening minds and attitudes towards caring for our Earth, giving hope we can survive in an increasingly hostile climate, celebrating biodiversity and its benefits, sustainability education and demonstration, regenerating damaged land.	I dont have a full picture of the project, but hope that it would use 100% renewable energy and materials to show us the full transformation from fossil fuels to renewables/zero waste is possible. A focus on opportunities for local and young people will also be critical to empower them. Understanding our indigenous flora and fauna also critical and how they support our health, wellbeing and even existence is greatly needed. I wonder if 4 hectares is enough space !	As a horticulturalist, I am very interested in the planting design.
10	Rehab of the mine site which would appear to provide something unique for locals and visitors to enjoy	I don't know enough details	I missed the two information sessions and would welcome the opportunity to attend another one
11	Tourism economy however with respect for healthland and the Anglesea community	It will be important to reflect on how the character of Anglesea will be respected	Whether large number of visitors will go into and potentially overwhelm Anglesea - I was

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
			impressed by Tim's comments about this being at the choice of Anglesea
12	sensitive use of land, education about the GOR,	I am very concerned about the road access and don't want traffic to flow from the project to Camp Road into the town (it's already very congested in summer). I think it needs a dedicated road going to and from the GOR.	I am interested in developments in the design, the river, road access, fire prevention measures
13	Keeping natural environment	I believe the four elements are excellent and would like to see a fifth element added being the Australian fauna and wildlife.	The possibility of adding the fifth element
14	environmental messages	Scale - it's too big for our township	scale, & the rest of Alcoa's development plans for the other areas so we can see how it all fits together. I cannot support the Eden Project without this information & results of past consultations with Alcoa.
15	Giving back to the environment.	Great ideas. The more trees and plants the better. Plants/areas to represent all parts of the world.	Wider community and student involvement.
16	rehabilitation, jobs, diversification of tourism attractions to encourage all year round visitors	The single biggest limitation is the access. This is an extremely high fire risk area. The Anglesea road is so busy and already experiences major tail backs. During peak holidays, how will this site be accessed and not adversely impact on existing local, commercial and tourist traffic as well as in an emergency? During bush fire season, how realistically can this be managed? The second issue is low rainfall. The concept designs show lots of greenery. However the new project will need to be drought proof. This isn't Cornwall where it rains 6 days out of 7.	nothing at this stage
17	Inspiring, immersive, educational, uplifting, an access base to positive examples and information of the environment. Benefits and highlights the local environment as well as globally.	The preview looks good. I would like to be involved in creating content that incorporates digital displays with original artifacts, with an artistic flare, to engage further and compliment the other elements already outlined and listed. Including: incorporating the geology of the area, from the start to today, and featuring the wonder of the local	Everything. I would like to be as involved and informed as possible please.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		plants in large-scale detail. To further educate and inspire via another mode of learning that would compliment the design and features, be equally valuable, and deliver the wonder via presenting the information in a new, entertaining, understandable and “wow” way. It would be perfect for the vision you are creating and have created.	
18	It could be very beautiful, provide safe nesting sites if an island is included and could provide extra visitors to the area if a paddle/rowing course was included in the design.	Please include a purpose built addition of a 2km rowing course using natural appearing amphitheater design for the finishing area. Currently there is no international standard rowing course in Victoria. The main infrastructure of toilets and car parking would be there anyway. A natural appearing amphitheater could be constructed at the finish line. This could also double as an outdoor theatre/performance venue particularly if situated on the southern site of the lake looking north, much as the ancient Greeks built their amphitheaters to make the most of the natural environment.	
19	Education chasing action to mitigate against the effects of global warming	Include animals and marine creatures of the area.	A new road from Forest Road past the site to a point neat Urquharts Bluff
20	engagement of people of diverse ages, ethnicity and rural/urban experience with the natural environment	N/a	Interface with local community growth is a flawed premise for wellbeing of communities. Eco benefits to a few can come at the expense of other environmental values and the social and environmental carrying capacity of our local community
21	its a productive use of an area of anglesea that has in the past been unconsidered	access to the park needs to be free and easily accessible for local residents of the area. For it to be a community installation, it needs to be readily accessible by the community.	power generation - the park is clearly going to need energy - what facilities will it provide towards self sufficiency.
22	None. Would prefer the land gets regenerated back to what it was before people destroyed the ecology so they could make money. Here we go again!	To delete the concept entirely. By the way...what does everyone think about our already cluttered roads in holiday times. There is insufficient infrastructure to support this in any scale. How about letting people	To hear it's been cancelled and the bush will be regenerated instead of someone needing to make money out of that land

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		experience the actual flora, fauna and landscape of Anglesea by being in it??	
23	Increased well being for people. Biodiversity, soil quality, educational benefits	The project is too big a jump for conservative govts, companies, business. Is it achievable?	I want to know how will the project integrate into the strengths of the Anglesea community
24	It would be amazing to have an Eden Project in our area. Having visited the project in Cornwall I couldn't even imagine how wonderful it would be. As a horse rider in the area I am concerned the area is preserved and used in a manner that is beneficial for all. Also as a horticulturist the benefits are huge. It would create employment and tourism.	Have not studied it enough to comment but am concerned about access as the road into Anglesea gets bottlenecked during summer as it is. But in saying that nothing that can be overcome as benefits are huge.	The progress of the developing issues
25	engagement with visitors on the GOR who might otherwise miss the deeper connection to place	nfrastructure will need to be sutainable, light on the earth, and to keep the entire project to a scale and size which doesn't overburdern Anglesea	commitment and funding
26			1. Detailed traffic management plans for the huge increase in use of Anglesea's already problematic traffic situation. 2. Plastic use policy and best practice reduction of rubbish plans. 3. Noise level policy and procedures to protect and maintain the close neighbouring locals continued peaceful living standards.
27		Please look elsewhere. This will spoil our beautiful small community	How to partition this further.
28	Earth and Water	Fire	All
29	Rehabilitation of a mine site, education and awareness - particularly in promoting Wadawurrung culture	There is no mention of the Wadawurrung people	Inclusion and involvement of Wadawurrung people
30	Everything. It should relate strongly to the community's desire to reinvigorate the natural environment and educate future generations.	You should consider the Domes. The setting of the former mine is very similar to Cornwall and is tucked behind the township by the coast. It would be fantastic to see a built form outcome like that. The landscape setting could accomodate this type of development.	Everything.
31	we need moor education about our environment and how to take care of it	it hasn't started . so i don't know	all of it .

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
32	Education	I think the natural water area could be used more dynamic. The Eden Project being set on the surfcoast, the lake could incorporate a wave generator for recreation and educational purposes, Wave dynamic study, effect on coastal erosion due to sea level rise etc etc	Once proposed ideas are clearer then it would be appropriate to have more information
33	that it will educate future generations on the environment and surroundings. It would be a great place to take schools kids on excursions	night attractions and possibly including 'sky' as well, like including stars watching and further universe understanding	possibly how it will operate and costs associated with running the place. We loved Gardens By the Bay Singapore. Transportation to the place would be ideal as well.
34	Educational	I don't know enough about the project yet but looks great	Integration with Indigenous concepts, sounds intriguing and very beneficial
35	Education and art	Nil	Nil
36	The potential rejuvenation of the area, and recreation opportunities	Add provision for mountain biking/hiking trails	The commercial aspirations of the project (potential accomodation/paid sites/shops
37	Educational aspects of the project	The element of fire could be explored with huge educational and really fun potential	Would like to stay informed as the project progresses
38	It will turn a blight on the landscape into something really beautiful. It will be a great place to visit and for the local schools to go to. We would be really lucky to have something so inspiring in our community.	Public transport to the site. include local endemic species like the anglesea grevilea	Timing and how I can get involved. I would like the local schools to be involved too. My child is in school in Aireys and hadn't heard about it.
39	Need more information	Need more information	Costs, who pays, what is the contribution from Alcoa, corporate structure
40	Though the initial preetation of the concept seem exciting, it's very 'airy-fairy' and vague in its current fiorm. It is, therefore, impossible to comment on specific elements - as there are none.e	See above.	Plans re minimising impact (traffic, crowding etc) on Anglesea and surrounds
41	All of the above is good,will bring tourism	Not sure but its good	?
42	Seeking to stablise the local environment	I think it should outline the impact that open cut mining may have on an environment but also explain the process of reclaiming the land and ecosystems within it	Is the theory of evolution the only perspective presented to the audience for reasoning of existence. Will the concepts of creation be included as both Indigenous and Biblical theory outlines creation. Will these ideas and

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
			concepts be included in the dialogue presented within each element.
43	Cleaning up the hole in the ground	Build a road around the back to take traffic away from town	The whole thing
44	The transformation of a damaged site into something that is valuable on a number of different levels.	The water zone, could have more happening with lighting, etc.	All of the project.
45	It is a Win for the Enviroment and it will benefit the Anglesea.	The acess road to the site.	Access to the site and employment for locals
46	The way it fit into the environment and the way it meets all the community concern of sustainability, low impact and environmentally friendly. That is educational and meets our native heritage and culture of water, fire and earth.	I think of the way that it will fit into our small village and relate to existing business and community. I think the concept has to engage outside the site itself which you may have in your vision.	The concept of the main structure which is not talked about
47	Rehabilitation of the mine site to its polar opposite, an educational centre for environmental awareness. Painting the larger picture through the mfour main elemental themes is neat.	If there was a way for visitors to actively participate in the rehabilitation process, such as by planting trees, that would forge a sense of connection to place and reinforce your values.	Whilst it is clearly an attractive venture for the transient visitors travelling the Great Ocean Road, is there tangible benefits to the Anglesea community aside from economic?
48	showcasing the natural environment and moving on from the environmental damage caused by the mine	How it links to the township	How the surf coast shire will ensure that the project goes ahead and they dont put any planning barriers in its way
49	Redevelopment in line with what I hope is local community expectations	Maybe not improved but would like more clarity about infrastructure needs and potential traffic solutions	See above
50	The environmental education		Environmental education
51	Education and conservation	Trail running, walking tracks	Traffic management people bring cars, Anglesea Rd crawls when traffic is heavy, how will people get access to this without blocking town access
52	Water and earth both harness the surrounding draw cards and provide an opportunity to education and highlighting of the amazing landscape qualities we are surrounded by.	Fire concept is great and I know it is challenging to harness the opportunities of fire, however there may be more opportunities to explore and hero fire on the site (especially given the impact fire has on the Australian landscape and native flora and fauna)	Air

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
53	An opportunity to transform the current site into a world class eco tourism place to share the beauty that is Anglesea.	Whilst I have not been able to attend the information sessions I believe I read somewhere that there is not any consideration for accommodation. I feel short term accommodation could be considered for both education and tourism. Experience the four elements after dark.	Timing, infrastructure, how it will be managed long term, impacts to local businesses, opportunities for employment.
54		Go elsewhere. 'Eco' Tourism is an oxymoron. Stop the BS spin. Come down the highway in peak season and enjoy the 2 hour already existent traffic snarl. Leave the coast alone and do this in a deserted area that needs the visitors. We have the beaches thanks. I'd like to be able to get to them.	The date of withdrawal of the project
55	If any developments are going to happen the Eden Project would the best scenario for Anglesea.	I would like assurance that retail cafes etc would be restricted	Is the so called affordable housing something the Eden Project is encouraging to house their workers. Also I am concerned that Messmate track gets open to traffic to the site in the future. Traffic to our area is a great concern to Harvey Street residents
56	A valuable re-imagining of a ravaged area which will showcase the local environment and educate public.	Love the concept but concerned about the flow of extra people/traffic it will generate.	projected traffic flow/management to preserve small town feel of Anglesea.
57	A facility which respects the local environment, as well as educating visitors on environmental issues would be fantastic. I also love the concept of turning a devastated environment into something beautiful and cherished because of its natural assets.	Unfortunately there is a level of distrust amongst the community of a consultation process involving Alcoa. I worry that this may transfer to Eden and think the Eden Project might be better received if it was presented separate from Alcoa.	Traffic management in Anglesea...this is already a problem in the busy season.
58	Redeveloping the area	the roads network wont handle the traffic and the area will be spoilt by hotels more residential buildings	how you propose to maintain the integrity of Anglesea and manage the traffic issues
59	If we have to have something - best in the world seems good. Liked that it could be kept separate from town. Hinted at solving the road/traffic problem of extra visitors.	Impact on town must be minimal but positive. 2 Solving the already out of control traffic issues of extra volume. Subject matter should major on world class heathland and its inhabitants. 3. what will then draw visitors down the GO Road? Need a "final" stage or element at Portland or similar - otherwise	Design, Scale, Traffic Management, separating town from negative impact

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		people will visit Eden and go home, missing the wonder of the real world.	
60	the rehabilitation on the vegetation.	more detail.	all of it.
61	the whole concept is remarkable	no thoughts at this point	Accommodation and road access
62	Rehabilitation of a degraded area.	More roads with multi language signage for safety in a bushfire area. Public transport. Encouragement for visitors to use retail areas in Anglesea town.	Funding for the project
63	The Surf Coast region has been in need of a significant ecotourism/ adventure recreation hub for many years. This Eden Project proposal is a tested idea, located on a parcel of Alcoa land that is primed for appropriate development since the closure of the coal mine in 2015.	Based on my knowledge of the Alcoa mine site, the township of Anglesea, the Great Otway National Park, Great Ocean Road and the broader parcel of Alcoa lease land, the proposal seems well considered in terms of appropriate land use. I'm now interested in the finer detail of how the project would practically roll out, including specifics around timeline and what would be required for the proposal to get the green light. Success can only have a net positive impact for Anglesea and the broader Surf Coast/ Great Ocean Road region. Not to mention, it is clearly a project of national significance.	As a permanent local resident, I am most interested in the short, medium and longterm impact on local residents, especially during the building/ construction phase. In addition, once the project is up and running, what are the projected visitation numbers, how will these impact on traffic flows, what additional pressure will be on existing community infrastructure, what will be the broader impacts on beaches and bushland, especially during the already busy peak tourist season? In addition, the local community stands to significantly benefit in terms of broader benefits of increased tourism numbers and the associated spin off opportunities that will arise for operators, local businesses, accomodation providers, food and beverage outlets etc - I'd like to know more information about these things.
64	Amazing use of the mine together an very valuable addition point of interest for grear ocean road	Too early to say but I full consideration of managing traffic will be a vital element	Traffic
65	Environmental benefit, potential for horticultural education	have big domes like in cornwall, they are instantly impressive and very iconic	layout, plant varieties
66	Creating an economically sustainable project whilst being linked to remediation of the mine site	I think the access issues stand out for further clarification	I am happy to wait for details to emerge from the consultation process.
67	Environmentally sustainable and exciting step forward - turning a liability into a major asset for the region	Incorporating the work of Mt Rothwell in some way would be amazing and befitting of the Anglesea area	Q3 cont... there is significant community distrust of Alcoa and with that may come some scepticism- I hope the community can

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
			see the value of this proposal and properly get behind it. I am hopeful they will.
68	World class eco destination	As it is an outside organisation it needs to be done in partnership with current destination based eco education centres	Concept design consultation and partnership approach
69	Region economy and education.		Interactive attractions and simulators.
70	The ability to turn a disused mine into something beautiful	There is plenty of land to make better roads in and out for the visitors	
71	improving knowledge of local species, by working with Parks Vic and other local environment groups	Lake. Make it more interactive, rowing, paddleboarding, smallboat sailing, picnicing on island destinations, or jetties, create reed beds and erect island cottages for nature lovers, accessible by boat = Loosdrecht in Holland, cycling, exploratory trails, 1.family 2. Cross country 3. leisure long-distance cycling - Kronamuller Park, Holland, Walking tracks, 3 levels, for short for family, longer to view point and another for fit people, Zoological concepts - ideas from Melb. Zoo, Aboriginal bush-skills taught, restaurant at water's edge, starting with breakfast with the birds! cafe too, name project - GREAT OTWAY INTERPRETATION PARK - in short ensure that it is a low-key interpretive park which directly interacts with people and animals, maintaining the health of both	Surveys on effect on Anglesea township and residents, how it will effect the GOR numbers of visitors, how will the numbers of cars be reduced? how will the adverse effect on the ambience and identity of Anglesea be handled?
72	I just attended your community consultation. The parts of your vision that stand out for me are "destination for immersive education and experiences which celebrate the local ecology and tell a story of sustainability", "environmental and social regeneration", "fusion of science and wonder". I would love to see an Eden Project in Anglesea. I particularly like your vision for Eden Sequoia as "nature's classroom". I would love to understand if this is part of your concept for Anglesea given the number of children who come on camp to Anglesea every year. I also like the work you have done in getting kids	I hope the message you take away from the session is how deeply locals love and care about their community and the environment. We live in a truly beautiful part of the world. I think there is a valid fear about the impact of mass tourism on the Great Ocean Road. We've all seen what has happened to the 12 apostles, we see the thousands and thousands of buses pull up at Bells and drive off, we live with the traffic jams in Anglesea on weekends and school holidays that stretch to the tip. We've seen developments insensitive to place like the chocolate factory. I think governments and councils love your stats on	I really hope you can make this happen. I think there is a massive opportunity to have a significant environmental and social impact. Please keep me informed.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	outside, nature play and the impact of nature on health. I would love to see you bring some of your learnings from your other international projects to Anglesea so that we can learn from and build on them.	jobs created and visitor numbers. I think locals want to understand that you connect with our place and recognise how special, unique and beautiful it is. At the moment it is still a bit hard to visualise how your concept supports this.	
73	Education and rehabilitation of environment	The lake seems unachievable	Disruption to residents
74	Rehabilitation and tourism	No comment	Need to be informed as the project proceeds
75	Making good use of the mine site, education, tourism and employment opportunities. environmental and sustainability education/information.	Need to reassure the negative/selfish members of the community re traffic and impact on local resources. an issue for employment is going to be affordable housing within a reasonable distance.	
76	Environmental	Unsure	Excited to learn more about all elements
77	Jobs for up to 300 people. Educating people of all ages.	Roadways in and out of the area need to be considered. Sealed road in and out from East and West directions.	Nothing at this stage.
78	getting people to interact with nature and understand the importance of the link with health and climate action	linkages in the landscape and benefits beyond boundaries. trail linkages and usages beyond the boundary and partnerships with other land managers	Goals and visitor projections
79	Sustainability, tourist attraction, jobs creation.	unsure	How they intend to address the traffic concerns
80	Complimenting the natural environment and rehabilitation of native flora and fauna	Ensuring increased traffic doesn't negatively impact the kangaroos on our area (don't want any more to be 'roadkill')	Whether there will be employment opportunities, in the educational and horticultural areas
81	Biodiversity and education		All
82	Environmental, Educational, Visitor interest drawing huge numbers from all over the world. I have visited The Eden Project and would love something similar on my doorstep	I haven't seen enough yet to make an educated comment	The benefits that the designers are hoping to achieve including the environmental benefits
83	Great use of rehabilitated land, tourism attraction - resulting in direct and indirect benefits to the local community. Environmental benefits, educational	None at this stage, it looks great. Having visited the Cornwall site several times, love	Nil for the moment, but once up construction phase starts, perhaps a weekly update on progress via your website.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	opportunities, a showcase opportunity for Alcoa	the visual attraction of the biospheres- so hope they could be included!	
84	An inspirational place to motivate a large volume of people to think about food systems, ecology, culture. A world class destination based on making the world a better place.	Don't know enough detail, but I hope the initial vision doesn't become a watered down version of a brilliant vision in order to satisfy squeaky wheels and small interest groups. Be bold!	Access from the hinterland, ie not from great ocean Road. Alternative routes from princes highway / Cape Otway road
85	STEM sustainability education	Too early to know	The plan for pedagogy and education
86	SUPPORT FOR SMALL BUSINESSES IN THE TOWN	THE GLASS DOMES SHOULD BE INCLUDED LIKE THE ONE IN THE UK	OVERALL IMPACT ON THE COMMUNITY FROM A ROADS PERSPECTIVE, THAT IS EFFECT ON ACCESS TO THE AREA AND THE TOWN ETC
87	Regeneration of a barren site, unique tourist attraction, boost local industry	Sense of connection with the sea	Nothing at the moment
88	Educational	I'm worried about the lake - how and when it will be filled and connection to the concept. Everyone is avoiding the question. Thank goodness it's raining!	Connections to town and the roads. Also what it might mean for area 6
89	education and conservation	?	Conservation elements. I see lots of possibility, but have no clear idea of how it will be. NOT Disneyland please.
90	Restoration of indigenous habitat	There must be careful consideration as to the impact of increased human traffic on a fragile environment - we don't want to go backwards	Environmental impact, traffic plan
91	Natural, eco tourism, science ...	Ensure there are multiple activities so people can spend multiple days there, visit regularly...	Accommodation, activities (water sports ?)
92	Environmentally appropriate use of this land with visitor interest	Unsure	All
93	Reclamation of abandoned land, creation of a national asset	I'm not sufficiently across the detail to comment	It's planning and development
94	To develop the scared landscape left by Alcoa.	Can't say haven't read up on the concept yet.	The whole thing.
95	Employment opportunities		Access to the site. How is the major increase in traffic going to be managed?

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
96	[REDACTED IDENTIFIABLE INFORMATION] I visited the Eden project 3 times once as a student and twice with my kids I get it totally words cannot describe how terrific this is for Anglesea and Australia and boy do we need it at the moment	Probably not a lot Australia so desperately needs conservation education	Jobs I would so love to be involved in the planning installation and on going maintenance , it's what I have been trained in [REDACTED IDENTIFIABLE INFORMATION]
97	Remediation, education, employment	Include some accommodation	Progress of planning and employment opportunities
98	Regeneration of sterile site in an absolutely magical part of our coast.	A huge need to really carefully evaluate the impact this will have on local community and the Great Ocean Road.	Progress and new developments.
99	A sustainable tourism opportunity which benefits the local and wider communities and acknowledges the indigenous community	information about how the Surfcoast shire will assist or not in infrastructure ie roads in/out and how that may impact on ratepayers	Further info on the wider design of the space not just the main buildings
100	It is the rejuvenation of an industrial area.	More information required	Traffic Management on GOR & township of Anglesea? Impact on local businesses in the same market as the Eden Project?
101	Tourism	Unsure	Everything, don't know too much about it
102	Anglesea desperately needs a new lease on life to complement the natural beauty of the beach and the bush.	Traffic congestion is easily managed and should not be a determination factor in whether the project goes ahead.	Relevant information will I am sure be provided in due course.
103	Restoration of the natural environment.	Less man made infrastructure	The environmental impact of the area due to the likely increase of tourists to the area.
104	Environment and sustainability education and positive jobs for local community	Nothing	
105	Creative rehabilitation of coal mine impact on local environment	More direct engagement with the local habitat and its Indigenous ancestors through both direct physical and reflective	Concept design after community consultation and with Indigenous leadership
106	Restoring the scar of the mine site. I also can see benefits to the local community for providing jobs, and a world class stage to showcase the Great Ocean Road. I would love it to focus on teaching of fire, flora, orchids and our undeniable and unique environment	Vision and clear allowance for management of accommodation and traffic management- particularly during peak times. I believe footpaths into the main town (via river) to allow for a safe link to the site. Discourage traffic to use Camp road to visit site.	Road and traffic management, protection of small coastal village to ensure it retains its village character. Our area is very unique and needs a vision to celebrate it in an eco sensitive way.
107	Reforest and rehabilitate the land whilst providing access to the area such as ecotourism	Accessibility and functionality	

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
108	Environmental	None concept is inspiring	Everything
109	Education, tourism, job opportunities, hope for the future, sustainability	Not sure	Horticulture/ Arboriculture
110	The environmental and having a moderating influence on the other tourism and residential proposals	Not sure yet	What is going in the domes? Is it heathland and vegetation as in the Otways?
111	rehabilitation of the site and education, especially young people	Need to know more about impact of increases to visitor/employee numbers.	What it could look like, how it would work, what sort of staff it would employ, how it can support Anglesea and surrounds to cope with the increased numbers.
112			Consultation with First Nations peoples
113	Recreating something beneficial and educational from what is currently wasteland	Addressing concerns about the local community being overrun by visitors	Regular updates on progress
114	Preserving the environment and not turning the town into a for profit theme park.	That depends on the detail! I must say if a 3 question e-mail is the extent of what you call feedback then it's pretty insufficient. For a start the project could be improved by making this feedback page meaningful. As a permanent resident of Anglesea I have a deep suspicion of "community consultation". In the past this has been a case of - consult the community and then ignore them and do whatever we want. A quick 3 question survey leaves me feeling deeply suspicious that you don't want any feedback, that this is about other people making money and whether that benefits our community or not is irrelevant. So here's the first area of improvement - actual consultation, transparency and accountability.. .	Everything! See you in the memorial hall.
115	The environmental rejuvenation of the previous coal mine	More comprehensive consideration of the volume of increased visitors and its impact to local community lifestyle and ensuring its not a gateway project for further development	Beside the concerns from question 3, more details about the educational aspect to visitors and what they would take away from their experience if such a project was to be completed
116	All of it, I WANT Anglesea to move into the 21st Century. Hopefully the government/s will get on board and upgrade the roads to facilitate growth.	I'd really like the lake to be "fishable" as well as just beautiful. This sort of thing will draw an influx of even more tourists than we already have....so I have BUSHFIRE concerns.	Where future development might lead, new infrastructure offshoots

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		There's only one road IN and OUT of Anglesea.	
117	Tourism, local jobs, rehabilitation of the site. A fantastic idea and use for this site.		
118	Restoring barren earth into something not only economically beneficial to the area ,but breathtakingly beautiful If is anything like the Eden project, which I have visited and which is a day I will never forget.	Do not really know enough to make an informed comment. Perhaps just to ensure that the project has parking and entry to to the project as we well planned and implemented as at the Eden Project. There it is really. Very efficient and effective.	More details about the eco system(s) they will develop.
119	Something natural and beautiful for future generations to have		
120	Restoration of the mine site in such a way that the environment benefits	As a wheelchair user I want to ensure that the design allows universal wheel to all members of the community	Design particulars referencing access for all
121	Nothing	Terrible idea for the town. Anglesea does not need or want this project	Numbers of tourists who will visit. Impact on current traders.
122	Remediation of the environment and a joyful creative addition to Anglesea	As much of the land available from Alcoa and state government should be handed to the charity to manage.	Traffic flow and perhaps on-site accommodation options for visitors.
123	Innovation	At this stage, only have minimal press releases to go on and much of those details refer to England	Size, intended use, initial cost and maintenance costs and who pays those, what further development o f the project is available, and who will be likely users,visitors and numbers.
124	Restoring the area to it's natural state	The size. Anglesea is beautiful because it's small. I don't think a man made tourist attraction fits with the town's feel	The environmental impact, tourism management, profiteering, environmental impact
125	Restoring natural beauty	Not sure	Coping with lots of visitors
126	Unsure, I have not been able to find any detailed information. Sustainability and education have appeal to me	Not sure	All of them, particularly the scale
127	Environmental Tourism, regeneration, walking and bike example		Regular updates
128	Environmental impact, bringing jobs to the community, great tourism for the area, another point of interest for all the kids that	Traffic management especially in summer and during high fire season , there needs to be another road from to back to avoid the great	Traffic plan, accomodation plan, impact study on increased tourism

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	come to anglesea on camps, beautifying an ugly site	ocean road , need to outline where the hotels are going - can anglesea cope with this many visitors?	
129	Creating a tourist attraction, drive for the local economy. Spotlighting sustainability and reversing environmental damage	Management of him larger numbers of visitors would affect the area	
130	The concept of remediation and returning this land to nature	This should not be a commercial venture. Anglesea is special because it remains relatively undeveloped. It does not need special attractions. This space should be returned to nature.	I would like to hear options about returning this space 100% to nature.
131	Opportunity to address regional sustainability issues	Narrow in focus. Could have negative knock on coastal impacts. Need to integrate vision with a sustainable development of whole of surf coast. Opportunity to establish joint venture rail link from Geelong to Warrnambool via Anglesea and other key locations. Would solve a number of different problems at once	How it helps address broader regional economic social and environmental impacts for the region?
132	Community connections, energy renewals, educational opportunities	Please ensure community are actively represented	Continued information about how Project will manifest in Anglesea
133	Providing a recreation precinct for our children and future generations.	Planning for visitors specifically the road through Anglesea which is severely congested in holiday periods.	Planning for traffic especially the great ocean road through Anglesea as visitors plan their holiday on the area especially during peak holiday times. Planning for bushfires. The great ocean road is the only road put of the area at present and it would get blocked in the event of a fire by departing cars and also may be cut off by fire. This has happened before.
134	Rehabilitating the site	Really concerned about the ability of the town and roads to absorb more people visiting the area.	Road and traffic management. Ability of town infrastructure to have significantly more visitors
135	The environmental rehabilitation of the site and the creation of unique interactive open air spaces to be enjoyed by a diverse range of visitors.	More access to walking trails, horse riding and biking trails throughout the larger area. A stepping point for exploring the wider Anglesea Heath.	What activities are envisaged for the lake area. Possible on site accomadation in the future?
136	Community focus	geotechnical stability	water level and coal stability

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
137	I think to regenerate the Alcoa site into a dynamic and interesting environment is a positive	I have a number of concerns	How increased numbers of the public will affect the local environment at Anglesea. For example increased volume of traffic, increased volume of people using local facilities
138	Rejuvenating the land and providing a outstanding community environmental hub	Haven't seen the plans yet	Getting involved with the landscape design and sustainability
139	All	Nil	Approval date
140	A complete revamp of the site as opposed to the mining industry concept of "rehabilitation ". Benefits for local community and business as well as for tourists. A focus on sustainability and harmony with nature rather than utilitarian, economic-focused environmental degradation and exploitation.	Remove the smoke stack	How it will help to promote better sustainability practices more broadly within industries that have terrible reputations for destructive practices and stranded assets.
141	Sustainability and local jobs/economy	?- too early to offer an opinion	Local trade
142	Positive for the environment, employment opportunities	Not sure	Funding and business model
143	Environmental education tion	Don't know yet	All of it
144	Positive use of the land		All of it
145	Eco-tourism and learning about the environment	My main concern would be excessive population pressures in a small town.	How it will be developed, how the extra traffic and visitors will be managed
146	Having visited England's Eden Project there are too many brilliant ideas to mention, but the whole environmental / sustainability of the project is fantastic.	Just improve on what's already been done	We'd love to be kept updated.
147	Education on sustainability	Promotion of active lifestyles	All of it
148	Land use in an environmentally useful and educative way. Employment.		Traffic access - both locally and highway, when in holiday season, the roads are already blocked back for kilometres.
149	A positive return back to the environment along with the potential of eco tourism benefits to the local community & Great Ocean Road	initial planning at the moment but see all elements as a positive	Eco tourism and including walking & riding trails
150	Rejuvenation of the site is win win for all aspects of Anglesea	Not sure	All

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
151	Anglesea already lends itself to eco projects with a myriad of group, camps and natural beauty, so this project makes absolute sense in every respect	Having seen the Eden Project in Cornwall, I would be very confident of the delivery of a wonderful facility that will be self sustainable via tourist interest.	Economic viability, although I would be comfortable based on the UK experience
152	Great for the community	0	0
153	Eco focus	Need to allow for greater traffic flows and build a bypass around Anglesea	Traffic management, increased need for amenities (hotels, restaurants, et) to support the development
154	Preserving the environment for the future	Road access / traffic is an issue. Impact on the Anglesea river if water is diverted for the proposed lake.	I am unable to get to the information session so details on the overall concept would be useful.
155	Educating about and protecting the fragile environment	More thorough environmental impact statement	All planning information including infrastructure e.g Road and traffic implications
156	Tourist attraction	MTB trails and hub	MTB trails
157	The level of forethought and planning that has gone into this proposal.	Will comment once I have absorbed a better understanding of the detail.	
158	Design, plant choice and tourism impact/benefit	Has their been a tourism impact/feasability study? Could this be better placed somewhere like the Latrobe valley that doesn't have the tourism Boom of the Great Ocean Rd?	I am looking forward to seeing a more detailed design
159	Sustainable re-habitation and long-term tourism boost to the area	Too early to say	All
160	environmental regeneration		More details regarding the planned buildings/structures on the site and their intended functions.
161	Understanding the fragility of our environment		
162	Rehabilitating the mine site to promote sustainability and highlight the importance of the fragile eco-system of Anglesea and the surrounds. By creating a positive eco-tourism experience for visitors and a community meeting place and center for the permanent residence and visitors alike	More detail about community involvement, how this will benefit the whole Anglesea community, create jobs, include our young people and how it can be accessed by those living in Anglesea. Would really like to see not only the history of place and environment but ways of educating public and supporting projects of sustainability moving forward. A vision on how to support the eco-systems of	How to become more involved, who profits form this project, how it will give back to the community and more details about what it will look like.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		the great ocean road through increased tourism and how to protect what we still have.	
163	Increase in employment and tourism in the area. Showcasing the areas unique biodiversity and hopefully educating people on this	You need to address traffic management from the outset. There is already a bottleneck at the bottom of Camp road and visitors to the centre could add to this	How it will be a part of the Anglesea community
164	Restoring beauty and increasing accessibility	Road access to this project not affect camp road traffic	All information
165	Planting and sustainable tourism	Recreational walking and biking paths around perimeter	Indigenous planting
166	This is an ideal concept reclaiming a degraded site to an environmentally acceptable outcome	It is not clear whether the eyesore of the power station smoke stack will be demolished and removed	Site clean up
167	education, employment, tourist attraction	out of my league	employment opportunities
168	None. It is a glorified theme park that can only be viable (like the original in Cornwall) by charging exorbitant entry fees and exploiting staff by very low pay rates and appointment on no minimum hour contracts.	It could be done by one of Australia's many community / environmental groups rather than a UK based company.	1. Why there is a high rate of complaints from staff at the Cornwall site? 2. Why does the Eden Project website claim involvement in so many projects around the world that do not exist or have been cancelled? 3. What will be done to ensure that if this project goes ahead that the on/going maintenance and refurbishment costs are guaranteed to be available from the project company so that they do not fall back on the community or the state? 4. Will the detailed financials from the operation (including payments and licence fees) be made available to the community (as a "not-for-profit" or "charity"). There are many others but these suffice for the moment.
169	Regeneration of the Alcoasite,encouragement of visitors to the area which will support local businesses & recreational facilities	Ensure the Anglesea River is also maintained	Access to the area - roads & parking
170	Community education about the Surfcoast and in particular the Heathlands environment with encouragement to engage in its preservation.	Until more details are known it is difficult to suggest improvements	I am okay with the information to date and will be attending a community session.
171		All	none

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
172	All of them	Very few. Get started.	Interested in knowing about access points, parking and the impact on traffic.
173	The educational value and also the tourism value of an environmental sound redevelopment	The water flow to the Anglesea river must be improved...relishing that it will never get to the levels it enjoyed while Alcoa was active	Water flow...educational value and revegetation
174	The fact that you are engaging with the community about what they might like to see post-mining	not sure	Modelling of potential economic benefits to the community. I don't believe the "at least 300 FT jobs"
175	Knowledge to teach and show our kids	Not sure	
176	Rehabilitation and repurposing of they site that will provide both environmental and economic benefits to Anglesea and district. Exciting addition to the Tourism product offering in Victoria	Clarity of purpose (which on - research, conservation, education or economics?) Also clear on Alcoas requirements to remediate site.	Happy to keep myself informed via website
177	Showcasing Anglesea's biodiversity and employment	Transport / Road upgrade plan, traffic congestion (roundabout in the village)	protection of native species, (no introduced species) and transport plan
178	Revegetation	Some kind of transport plan.	How can the roads service more visitors to the area?
179	Maintaining the landscape and preventing neglect	Impact on locals. It may become too busy for local road networks	Impacts on the beach
180	To encourage the transfer of information and sustainability	perhaps incorporating a dedicated education centre	the design and what you have in mind what is the flora you will include
181	Tourism	Day spa like hot springs	Every thing
182	Education	Don't know enough about it yet	Everything. Will attend one of the info sessions
183	Environmental outcomes	Haven't seen the plan, community has not been consulted so how can we answer	Size, infrastructure, environmental damage
184	Educating locals and visitors about the environment		Everything
185	Employment and land regeneration	Not enough known as yet	Residential land sales, accomodation, employment
186	Education in the natural environment, it's importance and vulnerability. Sustainability education. Couldn't be more important to	I would love to see opportunities for artists, especially those whose art promotes connection to nature.	How it will be run, as a business or an organisation?

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	instill empathy and a sense of connection with nature.		
187	Fauna/Flora Conservation	Conservation	Wildlife and flora conservation
188	The benefits it would provide to the environment	-	Funding
189	Development, nature and visitors it will bring to the surf coast.	it should be bigger and bolder	how nature will be brought back to the mine
190	Conservation	This project lacks involvement from the community. Longer discussions and involvement with community members are required. This area is so crucial to many plants and animals. Introducing further infrastructure may be incredibly damaging.	How is public safety going to be managed. Thousands of visitors use the great ocean road already. It is a high fire risk area. How will this be managed?
191	Eco tourism	More clarity around offering and partnerships	Who is the target audience and what is the size of the tourist market.
192	Lake	Deeper lake	How deep will the lake be?
193	No benefit to Anglesea or it's reside	It should not proceed	I don't want it in my town
194	Rehabilitation of the site, ecotourism	Unsure	Conservation opportunities
195	This has a huge potential for Anglesea. To grow the environment that made the coal initially could be fascinating. Victoria lacks a dedicated freshwater ecology center, and this project could really deliver that.	Exploring the connectivity of eden Anglesea to the otway national park, i.e trailhead hub could be a huge opportunity	Very interested to hear more about any element of this project
196	None (based on watching your video), but I will attend the community consultations to see if the plans for Anglesea look more appropriate than the Cornwall development	The way it looks, also the idea of attracting more visitors to Anglesea over the Summer period when the town is already over-capacity and over-crowded horrifies me, so I don't like the idea about more accommodation and retail areas, so perhaps keep that to a minimum	All of it
197	I see the benefit in telling the story of the transformation from a fossil-fuel extraction site to a sustainability centre. I think it is valuable as a model for transformation of other former mine sites around Australia. I love that it will help people learn about and celebrate our local ecology.	I would love to see a working demonstration solar farm or wind farm to communicate the transition from fossil fuels to renewable energy that our world urgently needs to complete. Inviting thousands of new visitors needs to be extremely well-planned to prevent disruption to residents, and to provide	How the infrastructure requirements of thousands of additional visitors would be managed.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		sufficient infrastructure to not cause more congestion and risk in fire season.	
198	revegetation of area and using the hole as a body of water	There doesn't seem to be any clear info on what it actually is??? What kinds of structures, what types of ecotourism would be involved. It seems very pie in the sky with no real detail	All of it
199	fantastic use of mining site and a brilliant idea to support the community by offering a tourist attraction	I haven't yet read all the plan	how big it will be access, the cost of project, possible expansion
200	Education	Space dedicated to children's learning	Children's dedicated area
201	increasing visitation to the area. but more importantly appealing to people who value the environment and seek to be informed and inspired.	none	what elements are proposed.
202	Education	Unsure as yet.	Impact, positives or negatives on water in Kuaka Dorla catchment.
203	Environmental education. Historical and futuristic	Have not yet seen an details	Detailed plans
204	Low impact, sympathetic to the environment and educational	The community needs more detail about exactly what is proposed, where, how it fits in with other plans for the Alcoa site and what the implications would be for traffic, noise etc.	All aspects (see above)
205	Unique development conscious of the locality and not in the hands of the local greenies	Unsure as I am not entirely aware of what is proposed	all of it
206	Not sure what the elements are to provide a comment	Unknown	How will it be accessed so that it has no impacts on local roads
207	employment	the duration of waiting	more information - not just for anglesea residents
208	Environmental education, the tie in with the site/area formation over millennia & giving people a fabulous reason/opportunity to stop at Eden Anglesea	Nothing	Just to stay informed of the project progression
209	Environmental education; protecting the local indigenous species; providing a sustainable water source for Anglesea River	Traffic management into Anglesea esp. Eden site during peak summer holidays	Education plan, esp for pre-school and school aged children. Opportunities for community involvement.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
210	Increasing tourism and education	Unsure	
211	Mine rehabilitation, community-building, food security, helping people feel connected to the landscape, eco-tourism (with some caveats), hopefully good engagement and opportunities for local Indigenous peoples	It seems that the Eden Project in Cornwall is a community hub. I hope that the Anglesea project will become similarly embedded. It seems as though there is a lot of community engagement already, which is great. Also, I noted the stated commitment to engage and collaborate with Traditional Owners, which is great. For me, that is the most important part of the project.	I want to work on this project! I have experience in community engagement/consultation, urban design and a range of other things. [REDACTED IDENTIFIABLE INFORMATION] it's been my dream to one day work for this organisation. I really want to be involved and would love to know if there are any work/volunteer/internship opportunities.
212	The general idea is beneficial in nature, removing a destructive concept and putting in place something beautiful is a great idea.	Possibly a swimming hole or something alike that	How close it is til construction
213	Attraction of tourists all year round, work for locals, sets a high standard for surrounding development, brings money and commercial stability/viability to town future and further investment, in keeping with ecology and community values	love It! Better than I ever dreamed to hope for	When will it start and how long will it take. How can I help get it off the ground?
214	None - we don't need to attract more tourists to our area.	Scrap it and just repair the damaged site	None - have visited the one in Cornwall and wasn't impressed.
215	I believe there are a number of positives: rehabilitations of a coal mine in consultation with a proven partner - the fern project. This will benchmark best practice and innovative thinking for all the other coal mines which will close in the next 20 years. The Anglesea heath is an amazing environment and has not been showcase for all to see and understand. The rducational opportunities for school kids through to people of all ages will be great. So much potential. Education for staff and volunteers, creation of quality jobs with an ongoing future rather than low level hospitality which is mainly those in coastal towns. It will bring a great natural attraction to Anglesea especially showcasing the biodiversity of the heath.giving the surrounding towns better employment opportunities. A draw card for day trips, a destination for cruise ships coming into Geelong. So many opportunities. Importantly in our increasing dense cities with	I think the traffic is going to be a huge issues especially in the summertime and that must be addressed. Enduring that valuable land is used for housing going against the consultation in 2016.	How it is envisaged occurring- consultations, timeline, proposals to manage the increased traffic. . Managing the tourism opportunities so the town isn't overrun

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	apartment s and big rise the value of nature to ease people 'souls' is so important. Recreation for people of all abilities.		
216	Incredibly creative and very exciting	There is NO information on how Anglesea and Surfcoast Shire will cope with the amount of traffic that will come to Anglesea. NO consideration of what happens if there is a bushfire. Routes in and out of the place must be considered.	Traffic congestion, roads in and out of the site.
217	Rejuvenisation of mine, local jobs, education centre, brings in economy to Anglesea	Complete an impact study on effects, traffic management plan, bypass road, emergency plan for high fire danger periods,	Impact study, how will you ensure jobs are for locals, (perhaps you can sponsor students through a whole variety of courses so they have a job when they finish) what's the impact on housing - will it increase rent and demand increasing rentals(it's already hard to find a rent
218		Don't want it at all. Too many visitors to our sleepy seaside area	
219	The Eden Project is a good concept but NOT for Anglesea. Anglesea's natural resources are already groaning under the weight of too much tourism. While the environmental focus of the Eden project is admirable, development would be detrimental and would change the nature of Anglesea FOREVER.	The project should be about rehabilitation of the environment and the river, not about bringing in extra tourists to the area. It should not be used as an excuse by Alcoa to rezone and build extra accommodation and residences in Anglesea. As stated before, a major tourist development will change the face of Anglesea and the Surf Coast forever. The original community consultations appear showed a serious concern by the community regarding overdevelopment of the Anglesea area. Features such as the beaches are already at capacity during the summer period.	There does not seem to be any concrete plans, just concepts at present. Would be good to see concrete plans to rehabilitate the land and particularly the river.
220	Rehabilitation of the mine area. Employment for local people, and from areas nearby. Education for visitning schoolchildren (to camps in Anglesea). Education for locals about conserving the Anglesea heath, and the same for Australian visitors. Fun. An inspired use for the hole in the ground.	One concern is the traffic going through the village of Anglesea, which I think the by-pass road will handle. I would prefer there to be a road north of the mine area, rather than Coalmine Road. I also hope that this would keep visitors out of the village, as I dont think it could cope with much more traffic - in the summer, and on any holiday or weekend. Also, I hoe the scientists can solve the problem f the quality of the water - which I	I would be iterestd to know if you are planning some gardens - vegetable and fruit, as in England. I think this woud be wonderful, for all the same reasons you have established them in Cornwall. I would like to be involved in that if it goes ahead. I am also interested in the possibility of facilities for concerts and performances. Anglesea really needs a

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		know you are well aware of. I think the whole idea is fantastic. Well done Alcoa and Eden.	bigger/better venue for functions than the Memorial Hall
221	Has the potential to make anglesea a destination and also teaching people about sustainability can only be a good thing	Would like to see more on what will happen on increased traffic to the area	Sounds to me like the project will only tack up a small area of the mine what is the plan with the rest of the land?
222	A superb envonmental initiative that will give integrity and opportunity on many levels	Not across this enough yet, but very inspired by what I see so far	Sustainability opportunities, work and education opportunities
223	The opportunity for large-scale education and connection with the natural world to promote and encourage people to live in a more sustainable way on the planet.	I think generally it's a great concept!	Keen to hear of all developments and further information.
224	It is the combination of the elements that together provide a "critical mass" that underwrites a successful outcome - other wise we face a wish mash of vested interest groups/ causes that could never agree or work together	uncertain - but - some form of accomodation/ eco cabins that would encourage visitors to spend time exploring the hinterland / region (Not just day trippers being served !!)	uncertain - but - the project is vast enough to warrant considerable support from State and federal government - and they should be involved
225	Rehabilitation of a toxic eyesore	Why make an unusable lake ? I dont want more tourists or shops, i live here because its like it is not for what it could be	
226	Educational conservation	Road infrastructure around the town	Potential employment in the conservation sphere
227	Jobs for locals ! I would also hope it gives Sponsorship to the local sporting community	No chimney stack ! Recreational use of the lake	
228	I would prefer the area in question ie old site of Alcoa and mine left to form a natural lake. Anglesea does not need to have such a project as the Eden Project. There is absolute natural beauty all around Anglesea and this overacted oversized idea of the Eden Project would spoil the natural beauty. The proposal if the lake I agree with - but leave any other development out of the equation. There's been enough development happening elsewhere along many coastal towns - let's leave Anglesea's true natural beauty to shine.	Anglesea is a quiet little beachside village - one of very few like it along the Great Ocean Road - Anglesea does not need big corporate business coming in to change the environment of Anglesea.	I think such a project will destroy the low key, quiet, relaxing feel we all have about Anglesea.
229	Educating visitors about the environment as it was, as it is, and how it could be into the future. I see an opportunity to transform	I feel that the 'concept' is so broad at this stage that it is hard to say. Generally, considerations should include leveraging	more info on proposed structures, environmental impact (on native species and natural environs moreso than the running of

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	Anglesea into a living example of a village that can live sustainably in its natural environment; this requires considerable support and collaboration with the Eden project and other orgs and gov.	existing networks of people/orgs involved in education, science, sustainability. Design of whole area should include connected network or active recreation routes (walking, running, mountain biking single track) and opportunity for passive engagement (eg. watching) with wildlife and natural flora.	the operation), inclusion of Aboriginal history, culture and heritage, impact on the primary school
230	Hopefully you thought of helping our wildlife	Conservation	Conservation and protection of wildlife
231	Opportunity to help Anglesea transition to 100% renewable energy.	Outline how the EPA team will work with the local community to increase the share of renewables in and around Anglesea.	More detail about how EPA will be 100% renewable.
232	The return of the land to its natural state, education about how to care for our environment	Reduced retail and commercial	Plans for traffic management and retail/commercial facilities
233	social and environmental impacts	It is hard to say while it is in the development stage. I think the community engagement is a critically important aspect of the project.	I would be interested to know about how the project will impact the economy of the local community in the construction of the project. Employing local businesses to undertake a majority % of the build.
234	Just about EVERYTHING...we will need to find traffic solutions for linkages to the main town of Anglesea. Camp road is very tight.	I wish I had such a clever mind but I don't. I have faith in the Eden team based on their projects so far.	I will stay connected through the journey and hope to be a regular visitor once open.
235	I think all elements are a benefit. And great for educational purposes	None have stood out yet	Visitor parking
236	environmental	so far the concept looks great	business and work opportunities
237	Sharing sustainable knowledge	Reduce traffic on Great Ocean Rd. Anglesea cannot handle "thousands of visitors"	Environmental/sustainable construction and interpretation
238	It would be fantastic to see a real vision for the site that embodies all the Eden concepts and encourages local Artist inclusion as there is a large art community within the Surf coast. Ecological rehabilitation is also paramount and local groups combine with Council to facilitate local contribution.	Broaden to include vistas from the existing preserved mine chimney - journey to the "air" in real terms.	All - i think it is fabulous and as an architect, i am very excited by interesting buildings. The earth project needs to include the volcanic (Lava) aspect evidenced along the coast near Aireys, and the Lift /Shift at Point Roadknight - both pointing to the natural features where visitors can be encouraged to explore beyond Eden to the real natural coastal phenomena
239	Earth and Water	Earth and water	Would love to just be along for the journey....nothing specific

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
240	Environmental education and first hand experiences	Not sure	Environmental education for children. Use of native plant species. Collaboration with Waddawurrung people.
241	Pathways to be wheelchair accessible. Integrated bike park	Indoor interesting, interactive spaces with accessibility	Please look at CHANGING PLACES toileting facilities
242	Providing an exemplar of taking what is a damaged and neglected sites and transforming and rebirthing it into something useful and beautiful. It also becomes an example of how we can, as a community, expect industry and the Government, to remediate environmental damage and change	We need to understand the broader community impacts and how we can leverage real value from this for local residents and visitors alike. Issues such as affordable and luxurious accommodation need to be linked to this. Particular liaison is need with local school recreation camps to form partnerships and leverage additional educational value	Community impacts and mitigation strategies, greater transparency of governance and funding (where is Alcoa in all of this), how this may influence other plans by Alcoa to use their large and remaining land holdings (do we run the risk of supporting a rejuvenation project and ending up with planning approval for sprawling suburbia in Anglesea
243	everything, only good can come out of such a project, from planning, construction and jobs and education. the involmnet of the indigenou people and local community is amazing.	can, will students (tertiary level) be involved	everything - i have only jsut learn of this project. id love to know how i coul be involved and thep potential job opportunities are/will be available as a conservationist and land manager
244	The rehabilitation of a large, unused space in a superb location		
245	Beautification and sustainable use of an abused natural area	I believe it is heading in the right direction. Very positive.	I hope there are more community consultations/awareness sessions as I was unable to get to the previous two. We are very keen to see this project in Anglesea.
246	Local jobs and work for indiginous population. Looks very impressive - hope it comes off.	Main concerns are the traffic in summer, people will not come to Anglesea as they are going via Colac - so we all miss out. Another concern is the problem of sewerage - must be treated and not just let out to sea.	
247	Mine restoration		Traffic management, tour operators, road access
248	Education - educating our children about our amazing environment and sustainability. Making more people aware of how we can have a positive impact on Earth. A very positive concept for our town, bringing our community together to work for something	As long as the infrastructure is considered: roads, parking, etc	I would like to be informed on the progress, outcomes of the community consultation session.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	amazing. WOW Education, education, education!		
249	Making Anglesea a better place to visit and live, not just stopping point for a short time.		
250	Transformation of a blighted area into something worthwhile	Consideration of housing which is affordable. Redress traffic - easy means of access which will not affect residents. Assume that it will not spoil the tranquility of Anglesea.	Housing Traffic Plans for areas north of the water.
251	Allowing visitors to see and understand the fascinating species diversity of the Kuaka Dorla catchment. Providing opportunities for locally raised young people to explain their home to others and earn money doing so. Educating visitors about Fire.	Tear that bloody chimney down	All aspects
252	Redevelopment of an ugly site. Exciting concepts for education, restoration. Asset for the region, wonderful concepts. Have seen Eden Project - very exciting.	Can't contribute yet to this. Too early. Looks exciting.	Road access Traffic flow Employment opportunities
253	Whole concept is so needed on our plant, we need more "Tim's" out there. So fervently hope this all goes ahead.	you've nailed it	In full agreement
254	Attract visitors to the area. Restore existing vegetation. Provide employment. Provide learning environment for schools. Educate visitors on maintaining the environment.		
255	pretty pictures, no detail		
256	The attraction of visitors to the area not only Anglesea but Great Ocean Road in general. Would draw tourist to Anglesea like the 12 apostles does to the Great Ocean Road Concept has strong potential as an educational tool to be used by many. Would reclaim the area to its natural eco state	Maybe over commercialising of the area above and beyond that shown to us, but it still needs all the facilities to sustain the attractions.	My first impressions were great, get it planned and started, the quicker the better. Don't let the greenies poo hoo the concept as used in this area to get council working on planning permit.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	to be shown to many. Would stand alone as our area of Victoria.		
257	Environmental education. \$\$ for local community		Will the existing smoke stack be removed? Whether there will be a bypass and where it will be if there is? Traffic management What other development will there be: tourist accom, hotels, etc. Retail - will it compliment Anglesea's current feel? What will be in other Alcoa freehold land? Will there be a negative environment impact on local wildlife?
258	Employment for locals. A project like this will have a very positive association for Anglesea to the natural environment. A project like this is much more desirable than an empty mine site. An excellent education facility about our environment (love the concepts of Earth, Water, Fire and Air).	No helicopters please. This is a huge project. As a permanent resident, I am happy to have the mine site rehabilitated, but I do not want it to impact my life. I do not want helicopters arriving and taking off. Traffic congestion on the Great Ocean Road - summer is already a huge issue that impacts everyone. The community as it is needs to be seen as just as important as the project. Tourism will change many things, but we also need to be considered.	Traffic plans Will there be accomodation? Plans for a helipad? Please say no! What sort of employment do you expect after the project is finished. Thank you for the opportunity given to us to consult about this project?
259	A positive use for the area. Education on mmultiple levels. A means of giving back to the community. Employment A water catchment for emergency bush fire control. Fine example of what a corporate citizen with the appropriate attitude can do in collaboration with a responsive and thoughtful community.	Given the concept incorporates 4 elements which, of themselves cover a multitude of activities, concepts and prospective expansion. I would imagine they will allow for that change. As the development proceeds and, given the speed with which technology responds and new frontier found, I believe the original concept as envisaged, will easily accommodate and incorporate these changes.	I believe the concept has been well presented. As it becomes viable in a practical way, being kept up-to-date would be great. Politically this should be a bi partisan project being in everyones benefit. Congratulations to Alcoa and best wishes to the Eden Project. Any nay sayers should be ignored.
260	Converting a potentially toxic wasteland into a beautiful eco park and tourist destination, providing employment and its regional flow	Family attractions interactive exhibits	Employment opportunities - artwork proposed (my daughter - painter, wife - muralist/potter)

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	on, encouraging government investment in infrastructure, especially roads.		
261	Rehabilitation of land scar. Tourist destination. Employment of local HR ans suppliers of local produce / services. Education of visitors to site.	The risk is the main issue when the existing population of 2.5K is tripled in summer season and then if we can expect to see an estimated 2,000 visitors to the centre each day. The escape routes out of Anglesea including townships further down the GOR, eg. Aireys Inlet people would be insufficient and problematic. Need to see a bypass road plan around Anglesea, eg. along Mine Road and Aireys / Anglesea Road, to feel that we would be able to exit before an emergency situation.	Town planning re-routing Eden Project Visitors from Anglesea township. I am a ceramic artist and I would like to know what local artistic / creative opportunities would be open in the design / development of the earth, wind, fire, water, concept.
262	The potential of making Anglesea a destination rather than a toilet stop. Growth of people staying longer, ie. Rather than 1-2hours - 1-2 days. Long term employment for locals.		
263	Preservation Education Job Creation Conversation Starter Income for the Town Trail blazing - no other town in Australia has anything like this	Concept is a great place to start and we need to deepen the conversation and co-creation of solutions to the concerns of some locals, such as traffic, income for the town and existing businesses, environmental impacts, etc. An investment solution/option for locals would be awesome to explore.	What happens next? Can we get involved in specific working groups on key issues?
264	Preserving the natural environment and providing educational opportunities for young people and others. Also creating jobs for local residents.	Not sure. I think you have done an incredible job of informing the community off your proposal.	Traffic management. The residential streets in Anglesea (O'Donohue Road, Harvey Street, Noble St), are already carrying too much traffic and I fear this development could create havoc.
265	The natural elements The lake Environmental aspects	Traffic management	
266	Best thing to hit the Great Ocean Road since the road itself. An absolute game changer for the Surf Coast. Apologies for any negative comments you receive as people have no idea how good this	Just lucky to have you considering the site. Like the RBG Kew Palm House undersea tanks would be good. More connection to the sea.	Employment I am an ex RBG Kew student - horticulturalist. I have a lot to offer you in planning, building and education. Not too many Australians have worked in glasshouses.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	is. I've been to the Eden Project 3 times and its sensational.		
267	The educational aspect. The efforts to incorporate/preserve the natural environment. The willingness to engage with the community. The humanist underpinnings of the Eden Project.	Like to see more of an emphasis on sustainability/environmental issues, eg climate change/renewable energy, etc), not just paying lip service to "eco-tourism", eg. Will the facility be solar-powered?	How it will impact the town. How they propose to manage the influx of people. How they will positively contribute to the natural environment.
268	Getting more people interested in how they impact the environment and how we can teach children and overseas travellers how to appreciate how precious our earth is. Also to extend the tourist season from 3-4 months to all year round (within reason and if infrastructure can support more people)	More community consultation about what they are doing - further information on infrastructure in and around Anglesea. Who pays for this increase need in infrastructure, ie. More roads / toilets. Is this going to increase residents rates?	everything
269	Project holds great potential in helping Anglesea to become an environmental sustainable town. Love to see Eden contributing on a wider scale by possibly working towards producing an alternative power source to the town. Could it also be feeding funds back into the community in terms of dune rehabilitation, planting and community projects that extend town wide rather than confined solely to the Eden site. Give the Anglesea residents something to be proud of town wide not just Eden site.	Fire risk Traffic Management Road infrastructure? Who pays for it? Entry cost to locals Local facilities, rubbish, cleaning, management	Cost to locals Consultation How are you quantifying the public opinion?
270	Revegetation for Alcoa Education opportunities for students and population Recreation, ie.walking, canoeing Local indigenous interaction	Access to the mountain bike area that will be displaced. These were consulted on and have been ignored. Opportunities for camping - lower cost simple facilities as school kids, lower socio economic families, cannot afford to stay here. Perfect opportunity to have school campsites adjacent.	Details? Education, camping opportunities Mountain bikes single track - 40cm wide trails
271	Educational Tourist attraction Reclaim Mine Environment around mine reclaim		

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	Fantastic concept Marvellous for Anglesea Hope it is a success		
272	How do you prepare to generate a return on your investment? How will thousands of people get into and out of the site?		
273	I don't see people using the lake for recreation - swimming, canoing, sailing, etc Will the water quality be safe? Will the wildlife be able to use the area?	Will the water quality be safe?	
274	We have an opportunity to preserve the remaining small native animals that still exist in the area. With any luck their numbers may be able to reach sustainable levels once more. A regenerated, fenced, safe area will be of benefit to them, to the environment, and in the long term to all of us.		
275	Development of a site previously inaccessible to the public. Wonderful environmental educational opportunity for all Victoria on our doorstep.		
276	Having a vision for the future Earth, wind, fire, air elements Tie to Indigenous culture	The plan B too ambitious. It's hard to get \$1M investment ideally, let alone \$150M Most of the comments I read on the board (sticky labels) are concerns, eg traffic, amenities. It is hard to have a vision with such myopic thinking.	Funding If private investors what are the commercial trade offs How will this relate to the Great Ocean Road experience What is the role for the new Great Ocean Road Authority on this
277	Positive - Beautifully and rejuvenate a disused mining site, however really need to consider impact to area. Need to consider transport access, accommodation Anglesea already at breaking point in Summer holidays and GOR comes to a complete standstill. Current round about solution is a complete failure. Please don't make this all about profit		really need to consider impact to area need to consider transport access, accommodation Anglesea already at breaking point in Summer holidays and GOR comes to a complete standstill.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
278	Showcase horticulture can achieve opp for students to learn world class skills and knowledge and put into practice Excellent for the General public to see how to correctly save a damaged environment	I like everything i see Main concern - traffic flow all year round, but particulary in the tourist season - I live local and know first hand how bad it can be.	As a horticulture teacher at the local TAFE I would like all info available so we can help as much as possible
279	The whole thing will be fabulous for Anglesea		
280	none		traffic
281	People visiting all year round		Traffic, what will happen with the rest of the land?
282	everything		
283	Revitalising Anglesea and opening up amazing spaces at Anglesea. Providing learning opportunities about the natural world to a diverse audience. Opportunity for partnership with Gordon TAFE conservation and land management courses/students	Things still need to evolve: parking, traffic management, bushfire risk planning I really like your community engagement process and the way you provided so many different levels of engagement of the information session. Gave people so many people opportunities to provide input in so many different ways. Also very informative and approachable	Water - where is it coming from Parking Roads/traffic any progress /update reports
284	Reclaiming land using indigenous plants Engaging local Wanawarrung elders in the design and running and ongoing promotion of the site Opportunity for Angelsea to be the gateway to GOR A place for generations to come	Careful, sustainable access to the site be considered Do you park off site and buses into site, rather than parking on site Educational oportunities - link with local primary schools to develop sustainability curriculum	
285	Attracting many more vistors however what provisions have been made to evacuate these people in case of fire?		
286	Benefit will be in local jobs and business Education about the local heathland and environment - our unique local heathlands is terrific Great opportunity for schools groups/youth camps (few thousand students visiting each year) to learn about rehabilitation and the environment. The same can be said about the older generation, learning how to care for the	The quality of the water in the lake must be solved - I believe is being addressed. The idea of a bypass road will take the bulk of the traffic away from the village. i am not sure that 2000 more people per day could be accomodated in the township of Anglesea.	Wonderful oppportunity for our village / state / country.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	environment.		
287	Education for schools Income for local shop owners Tourism increase	More emphasis on how the project will not overly affect the pressure on roads Potential for housing and other ways even can benefit the town itself	How it will impact the Anglesea River
288	Potential revegetation, the ability for the community to be involved in the process, it is not just a commercial precinct.	Detail of the proposed infrastructure such as restaurants, hotels, retail, etc. The footprint, height, style, numbers, etc. It is very hard to have an opinion without understanding more about what is actually proposed. Road networks How it can be ensured the proposal doesn't put the lives of residents at risk due to fire risk, as the road is already a bottle neck over summer and state government policy states that development should not increase the risk to existing residents.	Areas outside the Eden Project, such as Area 8. I am very concerned about the potential size of the development in other areas in particular the commercial development and do not have any understanding re numbers, size, heights, design and how these will complement the Neighbourhood Character Overlay Schedule 3. Consideration should be given to retaining the bike park as it could complement the proposal.
289	Beautiful sustainable concept that wants to support the existing community values as well as provide economic growth	More notification regarding information sessions Continued transparency regarding project timelines and data collected. Answers to questions regarding water, traffic, fire safety and other infrastructure that will inevitably result.	Outcomes of data collected on the project Transparency Timelines
290	Education and recreation precinct Sensitive to the local context, but contributing to the community journey to advance sustainability	Traffic generation and management need careful consideration Water management and the relationship between this project, particularly the lake and the health of Anglesea river.	Water management strategy Traffic impact assessment
291	Focal point and centre of excellence for environmental sustainability with potential to educate millions of people who live in, or visit our beautiful coastline. Inspire a better way of living	Wont know until we get more info Concept looks good	Emphasis on education and behaviour change for visitors. Will people leave with a new sense of responsibility and for themselves? (personal health and wellbeing), others, community and planet.
292	Great addition to the education experience that students already come to Anglesea for. Could potentially benefit students who wish to continue their education, eg. Like an	Don't see any issue, problem for most people will be in the detail. Impact in terms of life for residents, critically	Projections around visitor numbers Government infrastructure changes to accommodate The degree to which Anglesea Eden Project

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	apprenticeship / university studies that Eden Project Cornwall offers. For business it would certainly improve Anglesea's attraction as a destination.	infrastructure, noise Hope for significant community consultation	will be different to Cornwall, and more than a concept of the final project
293	Making good use of an ugly mine Teaching people about the environment, in a safe and contained area, but giving them a sense of adventure. Bringing the local indigenous people to have their say (important) and show thier heiritage to us all Please keep the smoke stack - paint it Make into a look out		Road access - fire etc
294	Retaining, promoting, nuturing the incredible biodiversity of Anglesea region is paramount Numerous benefits to the community, with considerate thought and planning this will provide a unique destination along with all the other wonders in the region. But care must be taken for it not to be distruptive to existing character of Anglesea and the region	Do not over do the [rominence of the built structures. Even though I am a retired architect, I think the balance between the built structure and the natural structure is important. The blending and melding has huge potential to make this an Iconic Project.	As the project develops, I would be extremely interested on how my queries are dealth with. If this is maximized, the project will sell itself
295	Help regenerate the mine site Serving as a model for sustainability Educating people / residents and visitors about sustainability concepts and about the importance of conserving the environment. Creating potential jobs for locals Attracting visitors to the area. jobs for locals tourism	As this is at a preliminary stage its hard to comment as details and specifics have not been released yet: Managing extra visitors to the area Traffic management Water conservation: its not clean, where would the water com from both for the lake and the small settlement	all of it
296	Not sure on the eco-tourism claim?	More focus on local conservation Fire risk keep refering to local indigenous groups Keep public access available to locals for Recreation Keep accomodation minimal	How is Alcoa's conrtibution working?
297		The whole area should be returned to a natural state	Traffic flow Area 10 activity

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
298	Bringing young people + children to Anglesea Brilliant for the 21st Century Learning about how all the elements of the project will help understand environmental needs, etc.	How the locals will have information and decision making in the process Fire danger considerations	
299	none	Scale right down Aboriginal input	Concerned about commercialism of the project Detract natural beauty of project Traffic for the town of Anglesea especially Camp Road. Anglesea will lose its character and small town appeal , how does this project retain this? Bushfire contingencies
300	World class enterprise that is based on solid community values Much better than possible alternatives Opportunities for young families remaining in the area	The project is still at conceptual stage so difficult to say. Involvement of all aboriginal communities and a greater input by more than a single isolated individual	buses, toilets, roads and accomodation
301	Community engaging in nature Environmentally positive Engaging people in nature		
302	Turning the site into a creative possibility Strenthening the viability and creativity of local Anglesea businesses Creating real sustainable jobs for locals Turning the "problem" into a commercially generated possibility	Ensuring there is local community involvement in some way, but is not dependent on paying entre fees, eg. music events, creative art events. Linking to the whole interpretation of the GOR - ensuring these are crried through all the way along the Great Ocean Road, to protect the wonderful textures that currently exist. Effort for supporting reusable energy generation be considered Flexible approach to water management Ensuring there is a connection in landscape planning all the way along the GOR Ensuring high quality design principles	
303	none personally for me good for the economy	More cafe and food facilities in the development to take the pressure off Anglesea Provide a ring road (behind anglesea) through	Water studies for the lake on a 30 year projection of available flows Traffic management study identifying increased traffic due to the development and

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		the developement - so traffic on GOR doesnt go through Anglesea	options to address, please publish these on website
304	Great educational opportunities for local community and visitors. Love the concept and possibilutues for immersive education	Where is power coming from? A great opportunity for renewable energy project in the town. Involvement at local schools.	Accommodation - what type and scale.
305	It's a beautiful mine, it doesn't need a big project		
306	Jobs, Australian Tourism	The elements that ensure it is sustainable	Free accessto the precinct
307	Concern for the impact of the town	Return the land to its original state. Community is successful the way it is	Use of the lake, what studies have been completed to determine the impact on town traffic, sewerage etc. Are these studies accessible? How will community support be determined? Will we have access to final reports detailing community feedback? How will the community kept updated?
308	Education, eco-tourism, encouraging sustainability & biodiversity - reclaiming degraded landmine	Economic cost, detail on roads/accommodation, trail running and bike tracks, bike park.	Cost, time frame, land reclamation and renewal, employment, smoke stack removal.
309	Wonderful for the community, local and nearby communities Inspired by the whole concept Awareness of rehabilitation of the natural flora and fauna in the area - rather than something which could have potentially been a "commercial horror" Education learning by default is great. Fantastic opportunity to showcase our unique environment. Terrific for kids.	Road access - great if there can be a road north of the site.	
310	Education Conservation Tourism Fantastic opportunity for Victoria	Locals need to know more about the impact of traffic	Anglesea River Protection of flora and fauna, wildlife
311	Rehab of environment Showcasing best practice & sustainability Saving/increasing habitat for local flora and fauna	Working with Govt to ensure traffic flow doesn't damage Anglesea and surrounds Amenity and liveability	Project progress

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
312	<p>If done well (big If) - opportunity for education about the local environment Development in conjunction with Parks Victoria and other already existing groups (DWELP) of centre of excellence for Environmental Protection Using a destroyed space to develop a specific use for the future</p>	<p>How will it succeed financially? How you going to get people to stop and see without massive signage? Apart from walking through "4 Element" experiences what do you do/see? Explain where the hundreds of jobs are going to be and who will really be paying them - extremely expensive entrance fees aren't going to attract visitors. What jobs and who will pay? What retail is proposed? How is it commercially viable?</p>	<p>Who exactly is behind the project and why? Details on costing, timing, existing GOR issues (traffic, fire, crowds)</p>
313	<p>If we have to have something, best in the world is good Can keep separate from town Encouraging about solving traffic problems World's best practice Scared by optimistic</p>	<p>Small town could be swamped Something at far end of the road more useful Environment overrun Road/traffic problems Must be positive impact on town Traffic already uncontrolled - how to solve? Should be world class (healthland) Focus on small scale environment within the vast scale. Drawing tourists further along GOR, visit this then go home, miss much of real environment. Final instalment at Portland, to finish the journey</p>	<p>Design Scale Traffic Mgmt</p>
314	<p>Limited information being made available so difficult to comment. Hope that the community consultation will be appropriate and genuine but have extreme concerns about this. If this can be done with minimal impact on the local environment and community it may be okay, but I am very concerend about the scale and the drawing of visitors to outside of the town.</p>	<p>Concerned about the impacts on the town and surrounds due to the lack of infrastructure to support such a project. Feel like there is a lot that is not being said here. There needs to be consideration to the proximity of the primary school. Vehmenantly opposed to extending town boundary and development of Area 10.</p>	<p>Consulttion plan and what is intended to occur. What will be the impact on the rest of the zones be very concerned around Area 10 and accomodation areas close to the primary school.</p>
315	<p>Great use of a vast space that needs rehabilitating sensitively. Exciting concept, but one not without some potential issues. It will create a beautiful area that celebrates the</p>	<p>Concerns regarding visitor numbers that will either overwhelm the town of Anglesea or completely avoid it as people journey directly to and from the site without bring their custom to local shops. Lack of accomodation in town for visitors to</p>	<p>Timeframe for completion and plans for traffic and visitor management</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	best nature has to offer in this region and it can be shared with visitors and locals alike	visit and say in the area, but do not want to over commercialise the town with hotels/resorts, etc. Concerns with traffic / access down already slow on Great Ocean Road.	
316	Education and science sharing Rehabilitation of old mine Creating a destination with focussed interest - minimising impact on the balance of the land Great for children / education for all	Great concept, well done	Roads, access, long term planning and traffic management
317	Visions for former power station and link with Eden project. This needs to be developed under many of the guiding same principles of the Eden project. Some details of how this site will be rezoned and how potential partners could engage with this site would be useful		
318	Preserving health land and bush / convironmental education, promoting oboriginal culture Art works The seed bank sounds fantastic Gardening Australia, last night had a segment on the new breakthrough in growing native bush orchids, this could be introduced. Reintroducing and protecting fauna Fantastic Idea	Focus on environment plants fauna. Move to top tourist attractions / flying foxes, but underand the tourist dollars will be very useful.	
319	Education Reinvigorating the environment Involvement of the Indigenous community Local jobs Inspiration Overall positive for the local community A way to inform visitors about how to look after their environment, including the Anglesea area It's a fantastic opportunity to show how a significant project can work with the local community, not only to harness the optimists	How will it benefit local community and wildlife	Addressing issues raised by community, ie. Traffic, accomodation pressures, etc.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	but to engage and hopefully change the pessimists.		
320	Regeneration of natural elements to enhance the local natural beauty To enhance the landscape to what it once was, with a 21st century forward vision.		Management of expected influx of visitors on existing infrastructure, ie. Local amenities, toilets, and especially the road network, already struggling to cope with peak season.
321	Beautifying the old Alcoa mine site. Bringing public attention to our Great Ocean Road area.		Plans for traffic which will increase in the area. I really think a bypass road around Anglesea incorporating access to the Eden Project site and existing along the Great Ocean Road beyond Anglesea + / or Aireys Inlet is a necessity.
322	Fragility / robustness of Plant Earth? Young people, locals elsewhere, connecting to nature (the 4 elements) and science. Getting politicians out of their anti-science, anti-nature A fillup to the regional economy. Getting people to realise you can spell it either Anglesea or Anglesey, depending where on the plant you are?	Need to plan for a 1-100 bushfire, so road access is vital; to include a 2nd route way in and out of Anglesea (Coal Mine Road) Water management - need to pipe treated water in (from sewerage farm in the Bellarine or similar) Social division: property interests V "We like this as they are", so an overall plan of framework as to where extra development across the township can go.	Bushfire Management Traffic management Water management Proposed development site in the township Signs of federal (Henderson/Coker), State and local council collaboration?
323	Sympathetic regeneration of a destroyed site. In favour.	Infrastructure - roads, affordable housing	roads affordable housing
324	Promoting natural environment, seed banks Educating visitors Jobs for locals Focus on climate change if possible Education	Would it be free? Free for locals? Would we have access to the environment around it? Can we get more information on the "elements"? Is it a static "exhibition"? Or would it change? Re water elements, what is the reference to Point Addis? Its not clear. How is it joined?	Information on the impact of Cornwall Eden Project on the local community? Pros and Cons. What studies have been done on proposed impact to local community? Traffic, accomodation, town character. How do we preserve current benefits of living here? Love the idea of the project, but concerned there's no future projections in the discussion.
325	Employment for variety of people Opening up Anglesea as a year round destination Improving the environment Planning for the future Bringing new people with lots of skills to Anglesea	How to mitigate against fear of traffic congestion and lack of affordable housing for workers in Anglesea Links with educational groups in Geelong - Tertiary, secondary and primary / early learning	How can local people be involved from the beginning?

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	Flow on benefits to Geelong area in employment, finances and environment	How can local people be involved from the beginning?	
326	Continued linking with Mt Rothwell, biodiversity and getting rid of weeds and ferals an absolute priority. Linking with local artists. Shuttle buses from Avalon Airport and Geelong train stations.		Anything, as it is progress
327	Opportunity for a small scale, appropriately scoped project which is respectful of, and designed, to enhance local flora and fauna. If done in consultation with locals and local experts, there is a possibility of a great educational facility that supports and respects the local, environment and community. This project, if done right, could set a benchmark for other areas surrounding it. Low scale, environmentally, respectful	Ensure the scope and scale don't have negative impacts on the perfectly functioning, little town we all love and live in. Design needs to be more relevant to local landscape + flora + fauna (no fake rocks) I am concerned about the impacts of visitors could swamp and irrevocably change the town for the worst.	Impact studies Access - which roads - what infrastructure required / impacts on existing. How this might be looked at holistically with other areas surrounding Area 6.
328	Create local jobs New business opportunities for local community Terrific opportunities for aboriginal employment and businesses Puts Anglesea on the map and has something to offer local, interstate and international tourists Promotes unique connection between the community and the environment	Stronger aboriginal connection and involvement Local content / businesses to be used in construction of process	Traffic flow and management Don't have accommodation in the site, allow local community and businesses to benefit from accommodation demand. Love it, great project
329	Thought of being able to utilize a pre-existing area for many community activities is very exciting. The inclusion of education, indigenous studies and recreation all provide a terrific and considerate way to showcase this part of the great ocean road.	Need to convince the minority of detractors	Everything
330	Diversity of flora and fauna Protection of flora and fauna Education of flora and fauna Access to flora and fauna Access to recreational trails for walking, bike riding, bird watching.	Road strategy - GOR, Coalmine Road Access from Eden Project to Aireys Inlet and further without going through Anglesea. Future plans / investment in upgrade in GOR.	Traffic, parking, road upgrade, access concerns

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	Access to the water body. Use of the water body to flush, fill and replemish the Anglesea River		
331	Recreation Returning the bio-diversity of the area. Adding another dimension to cultural + eco tourism to the area	Not informed enough about the project to give a detailed response, but access roads to the development is an important consideration.	everything
332	Utilisation of space Environmental design Jobs for locals	Consideration for performing arts venue; similar to Ukaria in the Adelaide Hills, sculpture garden, local artists	
333	Think this is a great project, please make it happen. Think it is a marvellous project and will be very good for locals and visitors alike It will inform people of the wonderful things that the area is about. Your project will take away an ugly mine site and fill it with beauty, interest and information.	Concerned about crowds and traffic.	How is the road and traffic to be managed, particularly in the summer. Evacuation for a bush fire, at the moment, is a worrying prospect. What can be done?
334	Education, inspiration, regeneration	More food e.g. urban, indoor food production	Opportunity to get involved
335	Long member of primary school, excited about using the space for education. Would be popular doing the GOR with knowledge of what is here.	Education facilities easily accessible for school camps (of which there are many). Believe 20,000 children attend camps around this area.	As a member on Angair, would like to help with this project
336		Watertight environmental/scientific management of exotic and non-indigeous native plants to ensure no impact on surrounding national parks and natural bush. UK operation is in farmland. Please protect our heathland / woodland / forest ecological communities.	
337	I see value positions on all sides of the concept and potential for many layers of knowledge integration across a wide range of stakeholders and community. Potential to upskill and inform visitors through to locls on sciene, environment, sustainability is quite facinating and enriching.	Have only attended the Anglesea drop in session and it looked and sounded from the people I spoke too, to be a very well thought out concept. The challenge is always in the transition phases with projects like these - To maintain	How Australian tech businesses can be involved. Science and tech aspects and issues specific to the location and environment

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		focus and mitigate this information with open access knowledge platforms.	
338	<p>"Anglesea, the surf coast and victoria in general will feel the positive impact from such an environmentally social and sustainable project in this pristine (existing mine excepted) and sensitive coastal area where the bush meets the sea."</p> <p>Future generations will be the greatest beneficiaries from the lived experience of the four major concepts and there impact and interconnection with our superb flora and fauna.</p> <p>I am particularly excited about the educational benefits for all generations. Being based on a successful concept in The Eden Project gives me confidence the Anglesea Project will work. Great news in this whole rather disappointing mine rehabilitation saga of the past few years.</p>	A little hard to say just yet until more detailed plans are developed and presented (hopefully) for comment.	<p>Traffic/vehicle movement plans?</p> <p>What ratio of private vehicles vs buses is anticipated to transport the required daily average patronage of 2,000 persons?</p> <p>How to balance the positive commercial impact on the town and food, retail, etc. with the existing quiet township feel that so many locals and newly arriveds aspire too?</p>
339	<p>Cleaning up the mine site</p> <p>Putting something positive and beautiful into the Anglesea environment</p> <p>Making Anglesea a known centre for environmental awareness</p>	Concept seems vague at moment more information needed	<p>What is the chance of it actually happening?</p> <p>The plan of the proposed development, when might it start and how long construction might take.</p> <p>Effect on land values of surrounding residential areas.</p>
340	<p>Replacing the horrible hole in the ground of the mine site.</p> <p>Perhaps having a world renowned site that will attract visitor to Anglesea</p>		As I own a house near the project I would like to know how it might affect land values
341	<p>Protection of the environment</p> <p>Educating young people about unique, as well as being a family friendly project.</p>	removal of chimney	
342	<p>Aboriginal history.</p> <p>Conservation projects</p> <p>Water quality</p> <p>Better management of tourist influx</p> <p>Scope for cultural/art events</p> <p>Education of future generations</p> <p>Local jobs</p>	<p>Less theme park</p> <p>Display of local vegetation</p> <p>Road access</p> <p>Impact study a must</p> <p>Impact on local development boundary</p> <p>Impact on local school and traffic</p> <p>No further development</p> <p>No hotels restaurants, retail</p>	<p>Impact statement</p> <p>Boundaries around development</p> <p>Who are the investors</p> <p>When does it start</p> <p>Road access</p> <p>Our town needs funding first with bike park, foot paths, education funding</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		Camping / outdoor experience for school visits	
343	Bringing awareness to this special part of the world. Conservation pursuits, eg seed collection, future jobs in this area - in environmental pursuits. I love the complete turn around for this part of our bush/environment.	Ways in which the project can be linked in with community involvement/activities. Traffic access - how this may affect resident in town - buses, etc.	Ways involved in the community can stay involved/participate in? Needs to be an active, changing project not a static park. We currently have an active couple of groups - Angair, Art House, Wildlife Rescue Group. etc, which would likely want to be involved.
344	great idea, totally wrong location, access and roads Another gravel pit. Access (in east) is problematic at the moment - one road in and road out	access,	
345	high standard education	traffic	
346	Environment, bring back life to a damaged part of our world		
347	Education and community involvement Visionary concepts along with the integration of the environment	More transparency on various stages of the project and budget.	More details on the overall concept plan and the timeline of implementation
348	environmental education for children	reduce size by 90%	
349	Environment Vision for our past and future Such an opportunity to do something great for our future generations Thinking globally not just narrow local	Include accomodation to keep tourists in the area	timing
350	Education Remediation Employment generation Innovation International acclaim	Like to see complete creative license for bringing the vision to reality. However, in order to get to this you will need the social license. That is the naysayers need to be placated. Most importantly the traffic generation and its impact on the Great Ocean Road. This must be addressed at the same time, otherwise the blockers will erode and undermine this vision.	Traffic management plan. The GOR cannot cope with further increases in volume of cars / buses. We need a second road option.
351	Conserving nature Drawing attention to our natural heritage by educating others, we can spread the reason	Delighted to be able to learn about it and have community consultation	How traffic could be managed, eg public transport to and from

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	<p>and desire for its protection. Creativity - allowing imagination projects to be fostered. Drawcard for tourism</p>		
352	<p>Looks like a theme park at this stage. Maybe the replanting might be good, as long as the planting is fitting for the area. At this stage, cant see any benefits</p>	<p>Theme park vibe of the plant. Anglesea is a unique small seaside, bush location. I've seen where the Eden Project is in Cornwall, it is a completely different environment, open farmland, no remnant natural vegetation. This concept would look completely out of place here. I moved to the area because of the sea / bush / small village feel. This would change the feel of Anglesea in a negative way. I have only recently moved to Anglesea and this project would impact on my living here.</p>	<p>Traffic control, roads are narrow, are we going to have a freeway through the town? More houses will become Air BNB, making it difficult for locals to seek long term rental More shops, the whole appeal of Anglesea is its not like Torquay or Lorne.</p>
353	<p>If we are to have a resort in Anglesea, then this is a good fit - surrounded by national park, seascapes, natural wonders then far better than another golf course. Major concern is traffic. Needs to ensure residential amenity of the town is not compromised. Road bypass needs to happen first, this is needed anyway. Summer season is already bumper to bumper and clogged roundabout. Must do something about this, even more if Eden goes ahead.</p>		
354	<p>Ecotourism, local economic benefit, focus on the environment Local residents should reap the benefits in terms of increase tourism, and putting a spotlight or profile of the area.</p>	<p>Traffic management and control is an issue of concern. Any residential/accomodation should be in Anglesea for proper benefit the local resident not compete against it. Opportunity for indigenous cultural exchange.</p>	<p>Traffic</p>
355	<p>Depends on all the details that are missing at this stage Enhancement and protection of the environment An improvement on the hole that's there at the moment</p>	<p>Local access to the lake is a concern given its user pays. Question that keeps coming back, what value does this add? Ie. There's already a natural environment, why is it necessary to build a natural environment facility. What is the value, is there in that?</p>	<p>Everything - how much would it cost to get in? What changes to road and infrastructure? What other elements if any are planned around it? Whats the long term plan? Is there a long term plan? What are the consequences for wildlife? Resort, roads, infrastructure around it?</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
			Have indigenous community been consulted? What does it offer for residents? Why would I go there? What does it offer for education?
356	Concerned that the Eden Project only covers a small section of the old mine site		
357	Beautification of the area, saving environment Saving our local environment My concern is the amount of traffic in Anglesea. I live in Camp Road and see how busy it becomes in Summer	Access By pass of Anglesea Develop Coal Mine Road to go through to Aireys	How you will deal with the traffic and the impact of so many people coming to our delightful seside town. We do not want to lose the charm of this environment and become another Torquay
358	Educational, tourism and rehabilitation of existing site Beneficial for our future generations		all elements
359	Opportunity to do something beautiful and keeping in touch with nature	Possibly less infrastructure. Does it need to be as big as the on in the UK?	Industrial shedding? New road access?
360	Not possible to determine what is the Eden Concept. My assumption is that a "not for Profit Organisation" has an idea to develop part of the site and allow it to pay for itself. Would it be about how the proposed education outcomes align with Australian Education? I would like to see a list of proposed ideas and how these marry with the concept plans on display. I would also like to see a 10,20,50 progress plan around ownership of the site. What changes to planning zones would be required and "future" protect these so they cant progress to unappropriate development.	Concerned about the amount of water required to fill such a large area. Floating islands and carrying water levels would facilitate water quality improement quicker. I worry about flows through the Anglesea River. The Wetland / lake does not appear designed to increase biodiversity and provide a variety of habitats (it appears more as a dump). There could be a larger focus on restoration of flora and fauna and rescue and captive breeding programs.	Interested in environmental education which is engaging. Like to know about all aspects of the plan. Roadworks have begun on Coalmine Road and a large amount of vegetation has been cleared. Were the local conservation groups given the opportunity to rescue plants from this area?
361	Environmental education. Concerns: Traffic, impact on infrastructure in town, loss of coastal village character which we treasure, loss of our peaceful, calm lifestyle, result of many years hard work to enable us to come here, Gold Coast style development	Maybe it would be more suited to a town that really needs this injection of commercialism.	Accomodation options - both staff & tourists. Implications for area 10. Who will own the land the project will occupy. Result of studies done on traffic movement. Resolutions envisaged.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
362	Providing education to those who visit and hopefully empower these individuals to be more environmentally concious. Generating a functional way to rehabilitate / redevelop the mine site	Light pollution - wildlife will be affected? Waste production by Eden Project - ensure that there is minimal waste from retail shops and cafes etc. Reduce - avoid plastic and aim to have reusable items. Increased recreation areas and increased conservation areas. Increased indigenou education / planting / seed collection and involvement	Further developments once the project has been put in place? Is there going to be any further development. Traffic? Ensuring that access to Anglesea isnt obstructed. Bringing in soil? Vegetation from other areas? Ensuring it links.
363	Protection / breeding areas for quolls / bandicoots, Mt Rothwell connection.		
364	Exciting project but don't forget local business groups		
365	Appears to be a great, high quality project. Which will bring high quality "add ons" to the district. Great idea of Fire/ Water, etc.	As a Harvey St resident, I have concerns about traffic management, local roads should not become rat runs	
366	High quality project with good aims and principles that support our community and show off our magnificent environment. I would be very proud of such a project to be in Anglesea."	Traffic management need to be looked at so that visitors are not using our suburban streets	
367	Educating visitors, the general public and expecially students on ecology, flora and fauna, the environment	No provision for adequate access and egress. The GOR will become a major road block, endangering people during high fire risks. Some of the construction is "over the top" and not in keeping with the local landscape (eg. The water element). The night element is obtrusivie and the need for dark sky at night. There is no emphasis on having only planting which are indigenou to Anglesea and district.	All, but in particular: road access and igrass, local landscape, target audience, environmental safe guards, protection of local flora and fauna
368	Providing an educational facility for the benefit of residents, ttourists and students which focuses on indigenou flora and fauna to the Anglesea surrounds, the environment and rehabilitation of the mine site	Construction needs to be sensitive to local landscape and blend into the environment. Entry and exit needs to be away from the GOR and avoid any build up of traffic particularly during the fire season. The GOR caannotcarry large volumes of traffic at present and already presents a danger during	Species of plants need to be indigenou to Anglesea area. Protection of local flora and fauna. Environmental safeguards. Target audience

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
		fires. Lightning up the sky at night is not in line with the need for a dark sky. Need to consider accomodation for those who stop over en-route to other attractions along GOR.	
369	Perserverence with revegation of the complete area in order to restore endemic flora and fauna to the site. The public relations exercise provided scant details of what is proposed	More details, and an impact statement on environment, planning requirements for the Surf Coast Shire	Extent to which Revegetation and environmental engineering on the site will be carried out. Measures taken to minimise environmental degradation caused by development on the site
370	Regeneration of a degraded site by experts who have already dealt with similar issues.	More detail on recreational activities	Recreation activites and time frames
371	Appears to have an aesthetic advantage, plus educational and recreation. It will be relatively remote from Anglesea Village, so overcrowding and immediate traffic problems in Anglesea fall away 5m visitors would be an issue on the GOR - This will be a problem on the GOR if only half go on down the coast, but that is going to happen anyway.	A clear traffic management plan (including parking at the site). How will the lake be managed (exclusion of motor boats / jet ski's etc - presence of which will detract from the basic Eden concept.	Traffic 1 & 2 supra
372	The whole thing		
373	Conservation, environmental opportunitie Tourism Becoming an iconic destination	Details on how and when	
374	Rehabilitation		
375	Education of the value of keeping wild places wild Benefit to local business and employment	Not sure about the scale of proposed project, traffic, killing what environment groups are trying to preserve in this area.	What businesses are going to run this project when complete?
376	Vision for site, engaging with the site, sustainability, education	Traffic management Indigenous focus and engagement Waste management Great concept whhich must now be grounded in the challenges and realities of infrastructure development and support	How to problem solve infrastructure demands and impacts

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
377	<p>What has happened to all the previous ideas to transform this site? Hope the concept does not end up as a Disney type theme park? Prefer the site to be returned to nature, bushland, camping ground, school camp, etc.</p>	<p>Make it more about nature and not futuristic buildings and concert venues</p>	<p>Roads, traffic, noise</p>
378	<p>Conservation of habitats and education elements Experimental journey Breeding and reestablishment of native fauna Employment of local people with a heritage focus</p>	<p>Traffic flow through and into park / parking Better understanding of impact on local traffic The design of the wetlands and lakes to ensure they are sustainable for the wetland eco systems Clarify how activities events / festivals would be managed to minimize impact on facility and surrounds</p>	<p>Camping, activity zones, social housing, comercial activities, traffic flow roads and parking, management of events and major activities</p>
379	<p>Turning an area that has had devastating environmental impact into a place that celebrates the natural world and educates people to connect with it. AMAZING. As an Anglesea resident in her mid 20s, I am excited by the variety of job opportunities, the Eden project can bring. Not just the jobs included in the project but the potential for it to become a creative space for local businesses</p>	<p>A place for locals as well as tourists. A place for local markets, events and outdoor music.</p>	
380	<p>Serving as an example for the local community and tourists / holiday makers in ways to live a more environmentally sustainable lifestyle. Conservation and regeneration of indigenous plant and animal life Raise the aspirations of the local community, ie more thoughtful design of community and commercial areas, walking tracks, bike paths.</p>	<p>Addition of more public spaces, playgrounds, bike paths, electric vehicle charging stations.</p>	<p>Impact on traffic on local roads Carbon footprint of project and ongoing carbon footprint</p>
381	<p>Rejuvenates the coal mine and gives Anglesea a fresh new focal area. An opportunity for Anglesea to have vissitors to the area that will put \$s back not just stop for breaks whilst exploring the Great Ocean Road.</p>	<p>Roads in and out and parking should be looked at thoroughly Anglesea river must be protected as a focal point in the area.</p>	
382	<p>Benefit of a high profile project for tourism</p>	<p>Detail of flora planning</p>	<p>timing and approvals</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
383	Australia is unique in the world, should promote this fact. Would like to see this area as natural as possible, not too many buildings and all buildings done in materials from the area. Kayaking on the lake Visitors have grown 63% great day trip from Melbourne, I'm excited for it to happen	Plant native shrubs to attract native birds	Access to area without having to pay
384	All 4 elements are beneficial. They are building blocks. What a great legacy for our children, "The contributions and involvement of school children in its creation will be of everlasting value."		
385	Restoration of the mine site, regeneration, job creation and environmental outcomes beneficial to the community	Impact on local environment and traffic within the Anglesea area	Traffic management local issues as an impact on community services and access information on job creation
386	Regeneration of the area, hopefully consultation with traditional owners. The existing chimney stack Education, not exploitation of the land Beauty of the flora An antidote to Adani Keeping Anglesea green There will always be traffic - now people can have stimulation or/and relaxation	Traffic management, duplicate road from Waurm Ponds roundabout into Anglesea	How the existing stack will be incorporated. I love it as it represents the history of the town. If too many don't like it - can it be build in by a surrounding greenhouse.
387		The Eden Project board could influence or even put pressure on Alcoa to offer genuine affordable housing for the young people who will be employed by the project. Housing will be a key to the success of the project and Anglesea needs permanent young blood. Bringing in cheap employment from Torquay and other town will simply cause more pollution / congestion on the already badly maintained roads.	
388	A inspiring and ethical revegation of the mine site. Could get Scomo on board to show alternative ways to fossil fuels. Make the whole site/project not powered by coal. Make	Make more of native environment. Blend it into the bush and lake with a large indigeous	Numbers of people expected and if they will be day trippers, year round seasonal event. Types of jobs offered to the community.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	it a world first, to show this country what is possible. Minimal emissons and buildt from sustainable materials	focus. Make it a lovely building that stands out and can be used for weddings, etc.	
389	Any coherent project would be good	This is a vague concept outline. I need more details before I can really have an informed view. There's a lot of wishful thinking here - wishful is good but detail will help	Where's the money coming from? How do investors make profit? Our roads are inadequate over summer, this only increases concern - access roads. How does climate change impact this project? A lake in 25 years with our current rainfall?
390	Conservation, flora and fauna, connections win Angair	Traffic plan Such a busy area to bring more people into Locals being impacted Over burden on locals Too big / inappropriate for our little town Negative impact on local tourism	traffic, fire, water body
391	Future employment Game changer for the Surf Coast + GOR tourism industries. You can't see GOR / 12 AP + Eden Anglesea in 1 day Scope to enhance environment in Victoria enormous	Ensure there is good community access to recreation activities in the surrounding areas, including water activities, walking, cycling. Ensure there is commitment and plan to improve infrastructure (roads, toilets, rubbish, etc) and facilities as visitation increases	Next steps Funding
392	Education about our unique environment including conservation	Would have liked to see what ideas the traditional land owners would have for the various concepts.	The process going forward
393	Example of transition to renewable energy and potential for education on energy matters Avoidance of an even bigger tourist development	Traffic managmeent particularly along Camp Road is a potential deal breaker. Anglesea Road, Camp Road and both end up parallel bottlenecks. Maybe a solution is to provide access for cars and parking from Forest Road (or an extension to Gum Flats Road). Limit access from Anglesea to walking or biking only (will be difficult if Power Station site is used for parking - dont think it should be). Stack should be kept and re-used. It is part of the history now.	Access provisions Road traffic Type of jobs
394	I know the Eden Project UK (British), love what you have done with the land. Love what you plan for this space. I know the public and community issues you		

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	might face and am keen to work with you to educate and inform. Beyond excited that this might happen here on GOR and know the impact and positivity it had for the UK Community. Good luck.		
395	None - this will ruin our coast. We do not need an extra 15 million people through every year. I live here because it is a quiet town. How is extra tourists environmental? The traffic is already terrible in summer. If you build another road that is more wildlife that will be killed. I am 22 and have lived here my whole life. I do not want to see my town ruined. People live here to get away from all that. Leave Anglesea alone. Stop trying to make money off the environment. Anglesea is not dying.		
396	Making use of disused mine		How the holiday traffic would cope with extra visitors. Presently traffic jams at Anglesea roundabout. Needs a bypass road from the mine site to Aireys Inlet.
397	Education Environmental awareness An exciting, amazing addition to the town		Possible extra roads for access during bushfire season
398	Flora and fauna education in the Otways - from heathland to forest to rainforest. All affected by fire and water or lack of The indigenous story - impacts on environment, information on edible plants, etc	Make sure everything reflects the local area as in the Otways Traffic management - encourage people to travel inland, not on the overtrafficed GOP - perhaps link destinations further on. Make sure local knowledge is used - Angair, AIDA, Friends of Eastern Otways, etc.	How traffic will be managed
399	Fantastic use of an ugly landscape. The opportunity to use the area for educational and cultural purposes. Hopefully it will bring people into Anglesea and benefit local businesses and residents.		timing, local and state government involvement
400	Benefits? What about the downside for permanent residents?	70-100 Tourist buses per day currently traverse the GOP (information from 2 bus	Cost/benefit and financial records of previous Eden projects. Full disclosure of company

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	<p>Traffic - at present Christmas, Easter, traffic in the town comes to a standstill - where is the traffic plan? Build a by pass road before you build the project? Cost?</p> <p>Sewerage - the towns sewerage system does not cope at high peak times. Recent residential development increases the problem. Will Eden have a standalone sewerage system or connect to town water</p>	<p>proprietors). GOR is said to be No.2, tourist attraction in Australia. This concept will enhance attraction? Will Eden do anything to ensure tranquility and quality of life of permanent residents?</p>	<p>P&L. Full disclosure of financial and business records of all principals, board members, share holdings, registered with ASIC, ASX, ATO, etc?</p>
401	<p>Ecological restoration, local employment, connection to land</p>	<p>Indigeous food, traffic congestion - already a problem, climate change education in area. How does it differ from a fancy park?</p>	<p>Details vague, how will it benefit permanent residents other than a tourist destination, ie, increased demand on limited facilities</p>
402	<p>The sustainability aspect and its great potential for education</p>	<p>Details vague, only at concept stage, could details be elaborated on further? The need for a world class mountainbike park would be more beneficial to the health and wellbeing of the township</p>	<p>most of it</p>
403	<p>The educational element will be of the most benefit, especially if it focusses on the ecological and historical factors leading to global warming crisis facing the local area and the planet. Bush fires, loss of habitat for indiginous fauna and flora through farming, logging and housing development are all factors to be explored within this projet. The other major players in this project should be the original custodians of this land. They should be central to the formation, development and ongoing life of the Project.</p>	<p>The elements of Earth, Air, Fire and Water are a firm foundation for the development for the project. However, I get the feeling that Fire should be explored much more deeply before any firm decisions are taken around construction of buildings and amenities. There is a paramount need for construction of road access and more importantly escape routes for tourists and locals who will be faced with bushfires. Water is also of paramount importance.</p>	<p>How much involvement will locals have in decision making, eg. Design, etc? What role will the CCMA and Barwon Water have in the project? What role does DWELP have in the project?</p>
404	<p>Enhances Angleseas culture for caring and looking after the environment. Offers employment for locals - youth, young families, keeping them in Anglesea. Education for our visitors (local & international), sharing our beautiful village and surrounds. Education and training in the areas of conservation, sustainability and the environment, "future good of our planet". Working with a Company/Organisation with a successful proven record.</p>	<p>I would like an information night, with information presented as per "Invite Only" sessions, I feel I missed out on importnt information. (I did enjoy the Open Sessions and the staff were great with their responses).</p>	<p>I would like to be assured that the redirection of Salty Creek would not have a detrimental affect on the river</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	Upgrading the old mine (which now looks like a scar on google maps) with beautiful, lush outcome which future generations can enjoy and learn about conservation and sustainability.		
405	<p>The positive environmental impact of site restoration into an environmental hub that fits into Anglesea's strategic ethos of adventure and nature.</p> <p>The employment opportunities, and training facility will assist in business growth for Anglesea, and locals.</p> <p>Education hub for tourists drawn to a project like this, with a proven record internationally. Highlights Anglesea as a progressive environmental hub ensuring growth and ensuring our services are maintained to a high standard.</p>	Additional information sessions would be beneficial. I believe the information sessions will promote confidence in the project and ensure it acceptance by the Community at large.	<p>The effect if any on the Anglesea River.</p> <p>The status of the pondage into a lake overtime.</p> <p>The size of the training centre.</p>
406	<p>Rehabilitation of the Alcoa mine site to stop erosion, deal with the lack of water supply to the Anglesea river.</p> <p>Hopefully replish the site with indigenous plants not introduced species, used as an area to educa+M171te people about the environment.</p> <p>Bring food and culture to the area</p>	<p>The infrastructure in terms of access to Anglesea via roads; the public toilets with tourist operators; sewerage treatment to Anglesea.</p> <p>River regeneration to increase the natural flow to Anglesea.</p> <p>Amount of people visiting and resources to accommodate.</p> <p>Cycle routes and walk routes in the area</p>	<p>Type of plants used in the project; hopefully indigenous to the area; the river regeneration.</p> <p>Sewerage treatment.</p>
407	Turn unused space into beautiful area.	<p>Traffic management through Anglesea needs consideration.</p> <p>The project will mean more visitors to Anglesea so traffic needs to be considered. One way on way to Lorne and then around back of Anglesea on way to Melbourne.</p> <p>Sewerage, where is it going? More people, more sewerage. Needs a management plan.</p>	<p>Traffic and sewerage.</p> <p>Planting, is it all indiginous to Anglesea are or are you lokoing at introducing species.</p>
408	<p>Transformation of current disused mine site into soemthing amazing and beautiful.</p> <p>Community input and involvement.</p> <p>Promotion and education about our unique coastline, eco-systems.</p> <p>Promotion of sustainability.</p>	So far from what I have learned in the early stages, it sounds fabulous an the best plan touted for the transformation of the former coal mine site.	Open transparency and available information as it transpires - I hope fervently that our community can whole-heartedly give this project the thumbs up.

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	<p>Education of our future generations (our children) on ways to look after our natural world.</p> <p>The opportunity for our local community to work together in a productive way to showcase our beautiful area.</p> <p>Employment opportunities.</p>	<p>Maybe try to calm negative peoples fears about traffic volume, numbers of visitors etc.</p>	<p>Funding?</p>
409	<p>Arouse curiosity in natural force.</p> <p>Educate in relation to the environment.</p> <p>Jobs during construction and ongoing research.</p> <p>Example of open cut mine rehabilitation.</p> <p>Ability to attract tourists as well as locals.</p> <p>Consultation with local community. BRAVO!</p>	<p>Short stay accomodation for visitors.</p> <p>More detail about the concept when available.</p>	<p>Assurance that Anglesea river water flows are maintained for the local ecology.</p>
410	<p>Huge benefit for educational learning, re: conserving our environment.</p> <p>Job employment during and after construction. Wonderful example of open cut mining rehabilitation.</p> <p>Great financial input into local community.</p> <p>Fantastic tourist attraction for region (especially Anglesea).</p> <p>Great communication with local community</p>	<p>Access to ongoing results.</p> <p>Thought about short stay accomodation for tourists.</p> <p>Possible school stay accomodation.</p>	<p>River flow to sea is not compromised.</p> <p>Local ecology preserved.</p>
411	<p>After going to the information session, I have decided that this type of commercialisation does not suit Anglesea.</p> <p>We do not have the infrastructure to support more people, vehicles at peak times in particular, but other times also.</p> <p>Would like to see Alcoa site developed into a low key, passive recreation area with a cave, board walks and bike/walking tracks/bird watching areas and managed by "Parks Victoria"</p>	<p>There is too much commercialisation with this concept and too many unknowns with a potential "Stage 2" of project.</p> <p>The project would certainly produce employment but overall, I think it would be to the detriment of Anglesea.</p>	<p>"Stage 2" Development is a complete "UNKNOWN"</p>
412	<p>Environmental education centre - potential to highlight the significance of environment (re: heathlands) around Anglesea.</p> <p>Fenced area where native animals can be kept away from pest animals.</p> <p>Night sky tours/ viewings to learn about</p>	<p>Details of what it will actually look like.</p> <p>Details of traffic management / impacts.</p> <p>Any conservation of adjoining areas.</p> <p>Potential accomodation / camping.</p>	<p>Impacts of area around the mine area - don't want to see adverse impact on valued heathland.</p> <p>Traffic - concerned about potential traffic increase in town and Camp Road in particular.</p> <p>Impact on community - concerned could</p>

Survey Number	Q1 - What elements of the Eden Project Anglesea concept do you see the most benefit?	Q2 - What elements of the Eden Project Anglesea concept do you think could be improved?	Q3 - What elements of the Eden Project Anglesea concept would you like more information about?
	astronomy. Make most of cleared areas of mine.		further affect housing market and create more incentive for short term accomodation vs residents / families who live here.
413	That an opportunity exists to not only remediate the Alcoa site but to develop a "destination" Potential economic benefit		Plans for infratructure - traffic, parking etc, Anglesea road as already a basket case. Costings - what is likely? Who is going to pay? Is it likely to provide employment for residents?
