**Dear Children,**

Did you see the film of aliens hovering over the Eden Project? And did you hear their call for action?

*“Oi, Earthling! A good planet is hard to find. Act now”.*

The message is clear – we humans need to look after our climate, nature and all living things more carefully, so that all Earthlings can live in balance for now and for future generations.

There is great news too. We already know a lot about how to do this. Humans are brilliant inventors and problem solvers. Many of the solutions are already out there. Each and every one of us has a role to play because even the smallest acts, added together, make a big change. Working together, we can achieve amazing things to make the world a better place – for us and for all of nature.

**It’s time for humans to dance a new dance.  
Will you join us to become Eden Earthlings?**

Your Eden Earthlings mission is to explore how we can rise to the challenge of climate change, in two ways:

- How low can you go?... starting with energy, to reduce your impact on the planet
- How much can you grow?... yes plants! Also, new ideas, new solutions and new ways of doing things.

We can also learn from others. You will find out how the Inuit of Alaska have traditionally lived in balance with nature, and explore what other young Eden Earthlings are doing around the world.

Please let us know how you get on. Share your work @edenschoolsteam or by email – [education@edenproject.com](mailto:education@edenproject.com).

Good Luck Earthlings!

Best Wishes,  
**Your fellow Eden Earthlings – the Eden-Harmony Schools team**
